

REHAB RALLY

Conference & Expo

The Gaylord Palms Hotel & Convention Center
Orlando, Florida • July 28-31, 2011

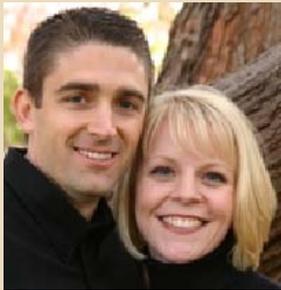

Energizing Education!

Proudly Presented by: HomeCEUConnection.com

letter from anne!

Hey Rehab Ralliers, Anne here!

It's hard to believe 2011 has arrived – time truly flies by when you're having fun! It's been five great years now that HomeCEUConnection.com has been providing rehabilitation professionals with value-driven, high-quality home study courses. Since the beginning,

we have heard from thousands of you regarding your experiences with our company, and we are truly thankful for all the kind words.

Based on your shared experiences, a few of you have steered clear of live seminars, due to the expense and time requirements. However, we've had an overwhelming response from MANY of you that love the live seminar experience and wished there was a way to combine the live experience with the value proposition. We also recognize that there is a large group of therapists that really enjoys the value and convenience of home study courses, but are limited by state rules and regulations, and must take live courses.

For the reasons mentioned above, we have taken a big step in order to meet the continuing education desires and needs of all our customers. Ladies and gentlemen (drum roll please)... We are proud to announce Rehab Rally Conference & Expo 2011! We have planned a three-day "Live" conference experience, providing you with the ability to attain up to 20 "Live" contact hours. These seminar sessions have been designed with you in mind, and to knock your socks off! The stunning Gaylord Palms Hotel in Orlando, Florida will be the event's host facility. Shortly after your arrival, the Rally will begin! The opening reception will offer you the opportunity to mingle with peers, visit with exciting Exhibitors about all things therapy and party the night away.

LETTER FROM ANNE!

But wait - there's more! We have secured discounted, remarkable rates at the Gaylord Palms Hotel for pre- and post-conference dates that will allow you to extend your fun and enjoy one last vacation with the family, before school begins. Additionally, we have secured special unpublished rates at popular local attractions, just for you and your family!

And I've saved the best for last! In true HomeCEUConnection.com fashion, we're going to allow attendees to bundle "Live" courses with home study courses, making the value proposition even greater. With one phone call, you can have all of your CEU requirements met – convenience and quality at an outstanding value!

We are hopeful that you will be as excited as we are and will decide to join us at the Gaylord Palms Hotel for Rehab Rally Conference & Expo 2011. It's going to be GREAT!

why rehab rally?

Why Rehab Rally?

If you have a 'Home Study' limit, prefer live conferences or want to turn your continuing education experience into a vacation, Rehab Rally is for you! Rehab Rally makes it possible to meet your entire continuing education requirement in one weekend... in beautiful Florida! Up to 20 'Live' Contact Hours may be earned at Rehab Rally, with purchase options starting at 12 hours ('Live' only) and maxing out at 70 hours (by bundling 'Live' and 'Home Study' courses). 'Home Study' courses are available in both mail and online formats and may be completed prior to the actual date of the Rehab Rally Conference & Expo 2011. How easy is that!? Flexibility at an outstanding monetary value and quality you can trust.

Professions Served

- Physical Therapy
- Occupational Therapy
- Athletic Training
- Massage Therapy

Approval Information Occupational Therapy

HomeCEUConnection.com is recognized as an Approved Provider by the AOTA (#5608) for the provision of Online/Home Study courses and has submitted for approval of the Live Event, Rehab Rally Conference and Expo 2011.

The following states recognize AOTA Approved Providers:
AK, AR, DC, DE, IL, IN, KY, LA, MD, MN, MO, MS, MT, NC, NH, NV, OH, OK, OR, RI, SC, TN, TX, VA, VT, WI.

HomeCEUConnection.com is a Florida Board of Occupational Therapy Approved Provider (FBOT #50-8744), and Rehab Rally 2011 Conference and Expo is approved as a Live Continuing Education Event (up to 20 Contact Hours).

Rehab Rally Conference & Expo 2011 / HomeCEUConnection.com courses meet the requirements for Occupational Therapy Continuing Education in the following states: AL, AZ, CA, IA, KS, ME, ND, NE, SD, WA, WV, WY.

Rehab Rally Conference & Expo 2011 and HomeCEUConnection.com courses satisfy NBCOT Professional Development requirements.

WHY REHAB RALLY?

Athletic Trainers

HomeCEUConnection.com is recognized as an Approved Provider by the Board of Certification (BOC) (#P3633), and Rehab Rally Conference & Expo 2011 is approved as a Live Continuing Education Event (up to 20 Contact Hours).

Physical Therapy

Rehab Rally Conference & Expo 2011 is approved for Physical Therapy Continuing Education for PTs and PTAs (up to 20 Contact Hours) in the following states: AK, AL, AR, AZ, CA, DE, FL, GA, IL, KS, LA, MN, MS, NC, NJ, NY, OR, RI, TX, WI, and WY.

Rehab Rally Conference & Expo 2011 has been submitted for approval of Physical Therapy Continuing Education (up to 20 Contact Hours) in the following states: ID, NM, and OH.

Rehab Rally Conference & Expo 2011 satisfies the Physical Therapy Continuing Education requirements (up to 20 Contact Hours) in the following states: CT, IA, MO, MT, NE, NH, SC, UT, WA, and ND.

Massage Therapy

HomeCEUConnection.com is a Florida Board of Massage Therapy Approved Provider (FBMT #50-8744), and Rehab Rally Conference & Expo 2011 is approved as a Live Continuing Education Event (up to 20 Contact Hours).

Orlando

Orlando, sun-drenched and spectacular, will play home to Rehab Rally Conference & Expo 2011. Located at the heart of Florida, Orlando is home to several attractions, including Universal Studios, Disney World ([click here for special pricing options](#)) and SeaWorld. The Gaylord Palms is offering Rehab Rally attendees special, promotional pricing 3 days prior to the conference and 3 days after. This means you're able to extend your stay and take advantage of all Orlando has to offer! For a list of fun activities, click on the links below of 'Things To Do':

*Go to www.rehabrally.com/mearscoupon to print out your Discount Coupon which must be presented to the driver at the time of transportation in Orlando.

The Hotel

Rehab Rally Conference & Expo 2011 was designed with enchantment and grandeur in mind, so it only seemed fit to host this exciting event at the luxurious [Gaylord Palms Hotel in Orlando, Florida](#). Gaylord Palms Hotel features unparalleled restaurants, lively on-site activities, and three magnificent atriums that pay tribute to Florida's beautiful environment. Space is limited, so make your reservations today by calling the Gaylord Palms Hotel & Conference Center at (407) 586-2000 (Mention 'Rehab Rally 2011'), or online at <http://rehabrally.com/resort> to book a room for only \$129 per night (that's more than a 50% savings off regular published rates)!

Hotel Amenities

- Four and 1/2 acres of lush gardens and winding waterways under glass to explore
- Relâche Spa with salon and fitness center
- South Beach pool reserved for our adult guests (18 and older)
- Clearwater Cove water activities playground featuring a zero-entry pool, octopus water slide, sand play area, waterfall and tons of water play fun for kids
- Coquina Dunes Recreation Park including executive golf putting course, sand volleyball, croquet lawn and more
- Six innovative restaurants and lounges
- 24-hour dining available at Java Coast and through In-Room Dining
- Live entertainment nightly
- Retail street with unique shops
- In-room child care services offered by Kids Nite Out

educational experience

Enhance your continuing education adventure by participating in the Rehab Rally Conference & Expo 2011 experience! A powerhouse event for PT, OT, AT and MT professionals, Rehab Rally was built with flexibility in mind.

Rehab Rally presenters, engaging in approach, are ready to create an electrifying educational environment. Attendees can expect an unmatched learning atmosphere where extraordinary video, in conjunction with top-quality audio, will make every seat the 'best seat in the house'. Interactive presentations will make subject matter easily embraceable, while flexibility will allow for a dynamic of customization.

As proponents of variety, we're excited to offer a vast array of rehabilitation topics! The conference is built around three approved tracts covering an immense spectrum of exhilarating material, including:

- **Tract 1 - Orthopedic/Sports Medicine**
- **Tract 2 - Geriatric Rehabilitation**
- **Tract 3 - Lymphedema/Myofascial Release**

Each tract consists of multi-disciplined and highly-credentialed presenters that will provide a well rounded, theme oriented educational experience. However, should an attendee want to add some spice to the experience, they will be able to smoothly transition ("tract skip") between tracts to create a tailored continuing education event by attending sessions from multiple tracts. Attendees may choose to attend the Rehab Rally "Live Only" events by choosing between two offerings, 12 or 20 contact hour programs. Looking for more flexibility? An attendee that would like to fulfill Live CEU requirements and continue to take advantage of the convenience of Home Study Programs can choose to take advantage of Live/Home Study Bundle options. These Live/Home Study Options are available for purchases of 20 contact hours up to 75 contact hours.

EDUCATIONAL EXPERIENCE

Rehab Rally Conference & Expo 2011 is an unsurpassed educational experience, ready to be unleashed. Join us to complete your continuing education requirement, among peers, in beautiful Florida!

Conference Learner Objectives

- Recognize cutting-edge information on the topic of functional rehabilitation of orthopedic, geriatric and lymphatic dysfunction with respect to the clinician's designated patient populations.
- Engage in hands on instruction related to the rehabilitation of specific disorders within the clinician's health care setting.
- Identify several indicators and distinguish proper utilization techniques for physical agents and manual modalities in relation to the rehabilitation process.
- Identify the significant impact of Pharmacology on the rehabilitation process of a range of rehabilitation populations.
- Discuss influential, evidence-based practice literature, in regards to a variety of rehabilitation populations.

Tract 1: Orthopedic / Sports Medicine

Friday, July 29th 7:30 a.m. - 11:30 a.m.

Session 101: Pharmacology for the Rehabilitation Specialist - The Orthopedic Patient

Suzanne L. Tinsley, PhD, PT

Rehabilitation professionals often encounter patients prescribed a multitude of medications used to treat musculoskeletal dysfunction and additional, unrelated co-morbidities. This seminar will use case examples to present a brief summary of some of the medications often seen in musculoskeletal dysfunction and to demonstrate the relationship between a patient's medications and therapy. Stress will be placed on medications used in the management of pain and inflammation. Furthermore, the seminar will acknowledge other medications often seen in the orthopedic patient.

TRACT 1

COURSE DESCRIPTIONS

Friday, July 29th 1:30 p.m. – 5:30 p.m.

Session 102: Manual Lymphatic Drainage for Orthopedic Conditions

Carmen Thompson, BS, LPTA, CMT, CLT

Manual Lymphatic Drainage for Orthopedic Conditions will analyze the anatomy and physiology of the lymphatic system as it relates to caring for orthopedic conditions, injury and post-op edema. After understanding the correct indications and contraindications for treatment, attendees will receive an insightful summary of how manual lymphatic drainage can create a major influence, with positive results, in clients with orthopedic and post-op edema. By easing inflammatory edema and stimulating the lymphatic system, many patients have a swift reduction of edema and pain, leading to a timely recovery, in terms of function.

Saturday, July 30th 7:30 a.m. - 11:30 a.m.

Session 103: The New Science of Therapeutic Taping-Theory, Practice and Treatment Progression

Andrea Wolkenberg, PT, MA, CKTI

Graceann Forrester, PT, DPT, CKTI

Therapeutic taping has progressed over the past several decades from being a modality that simply prevents injury by prohibiting or limiting motion to one that can influence muscle function, release fascial restrictions, improve circulation, support tendon and ligament, and prevent pathological movement patterns. This course will explore the major taping techniques currently in use. Attendees will learn the basic theory, function, and application principles for each, with special focus on the Kinesio Taping Method. Through lecture and demonstration, they will learn taping treatment protocols paired with other modalities for some common clinical conditions. Attendees will take with them a greater understanding of the appropriate taping methods for practical use in the clinic.

Saturday, July 30th 1:30 p.m. - 5:30 p.m.

Session 104: Effective Examination and Treatment of the Shoulder Complex

John W. O'Halloran, PT, DPT, OCS, cert MDT, ATC, CSCS

Effective Examination and Treatment of the Shoulder Complex will include a brief anatomical review of the shoulder complex, discussion of evaluative procedure, specific therapeutic intervention and the review of multiple case studies with demonstrative video of patient interaction. The case studies presented in this course use clinical reasoning based on the highest level of evidence available. At the conclusion of the course, the attendee will be able to identify shoulder pathology via an effective systemic assessment process, as well as, identify creative therapeutic exercises and techniques that consider all functional planes of movement and incorporate the evidenced based kinetic link model.

Sunday July 31st 8 a.m. - Noon

Session 105: Therapeutic Modalities: An Evidence-Based Approach

Jon DeBord, PT, MS, ATC, SCS

An engaging discussion, using contemporary, significant literature, regarding the application of therapeutic modalities in a clinical setting. Major modalities discussed will include therapeutic ultrasound, iontophoresis, heat/cold, neuromuscular electric stimulation and transcutaneous electric nerve stimulation. Discussion will also occur on the subject of emerging modalities of infrared and red light therapies and low-level laser therapies in the treatment of soft-tissue disorders. Further attention will be given to clinical application and outcome data, in relation to particular disorders.

tract 2: course descriptions

Tract 2: Geriatric Rehabilitation

Friday, July 29th 7:30 a.m. - 11:30 a.m.

Session 201: Treating Balance and Fall Prevention for the Geriatric Patient

Geoff Mosley, PT, NCS

Falls are a leading cause of disability and death among the elderly. It is often that the issues leading to a fall are commonly attributed to the effects of aging alone. However, the causes of falls are multifaceted and often include balance and mobility impairments that are a result of disease processes. Many of these impairments are amenable to therapy intervention. In this course we will outline many of the risk factors and impairments leading to fall risk, how to evaluate high risk patients, and ideas for intervention. This course will include discussion of the therapy management of musculoskeletal, neurological, cardiopulmonary, and specific sensory disorders that lead to imbalance and falls. In addition to addressing risk factors and physical therapy management, we will also go over prevention strategies for both home and institutional settings.

Friday, July 29th 1:30 p.m. - 5:30 p.m.

Session 202: Body Weight Supported Gait Training for the Geriatric Patient

Geoff Mosley, PT, NCS

Body weight supported gait training (BWSGT) has been an increasingly popular treatment modality in both research literature and the therapy clinic. While the focus of this treatment is most often in neurological rehabilitation settings, BWSGT is a useful tool in any setting where patients have less than ideal walking abilities. In this course we will go over the principles of BWSGT, the science behind them, and how to apply these to the geriatric population. We will detail the physiologic basis by which BWSGT has its training effects and how to best utilize it with various patient diagnoses and impairments. We will also discuss the unique needs of the geriatric patient and how BWSGT can maximize the patient's therapy outcomes while minimizing risks.

Saturday, July 30th 7:30 a.m. - 11:30 a.m.

Session 203: Pharmacology for the Rehabilitation Specialist - The Geriatric Patient

Suzanne L. Tinsley, PhD, PT

Rehabilitation professionals often encounter patients prescribed a multitude of medications used to treat the disease processes connected with aging and additional, unrelated co-morbidities. This seminar will use case examples to present a brief summary of some of the medications often seen in the geriatric patient and to demonstrate the relationship between a patient's medications and therapy. Stress will be placed on medications used in the treatment of cognitive irregularities of the aging, balance/vestibular-related deficits and will also acknowledge other medications often seen in the geriatric patient.

COURSE DESCRIPTIONS

TRACT 2

Saturday, July 30th 1:30 p.m. - 5:30 p.m.

Session 204: Functional Testing for the Aging Adult

Jon DeBord, PT, MS, ATC, SCS

Functional Testing for the Aging Adult discusses the relevance, the dependability and the power of frequently-used functional tests for the geriatric population. Tests included in the discussion will comprise of the FIM, the Tinetti Balance and Gait Assessment, the Timed Up and Go, the Berg Balance Measure and several other specific functional tests. Contemporary and significant literature, exploring performance thresholds, sensitivity and preciseness of each test, will be examined.

Sunday, July 31st 8 a.m. - Noon

Session 205: Enhancing Functional Outcomes Through Seating and Positioning

Michelle Lange, OTR, ABDA, ATP/SMS

Enhancing Functional Outcomes Through Seating and Positioning presents fundamentals for use in the geriatric population setting and is designed to provide the skills needed to identify, assess and treat related problems. Seating and positioning has become a mandatory skill for most rehabilitation professionals, especially those practicing in assisted living facilities, skilled nursing homes and other similar settings. Common situations and conditions will be addressed, as will the basics of seating and positioning evaluation and intervention practices. This seminar highlights the essential abilities required to successfully produce functioning outcomes.

tract 3: course descriptions

Tract 3: Lymphedema/ Myofascial Release

Friday July 29th 7:30 a.m. - 11:30 a.m.

Session 301: Myofascial Release Clinical Applications -
Upper Body and Lower Body

Theresa Schmidt, MS, PT, OCS, LMT, CEAS, CHy

This Myofascial Release (MFR) course will serve as a foundational learning experience with a review of literature including fascia research. The physiology, biomechanics and pathological implications of connective tissue will be covered including a differential diagnosis discussion covering common myofascial conditions such as fibromyalgia, myofascial pain syndrome, and mechanical dysfunction. Irregular tension in the fascial structures contributes to compensatory, and frequently painful, movement patterns. The course will include a survey of the subtle motions and limitations intrinsic in the body tissues that cause these irregular tensions, as well as selected therapeutic interventions for the cervical spine and upper quarter. Also covered will be the integration of myofascial release/soft tissue mobilization into a clinical treatment program to improve mobility, reduce pain and restore function across the lifespan. Included will be descriptions, demonstrations, (video and/or live demonstrations) case reports and discussion of results.

Friday, July 29th 1:30 p.m. - 5:30 p.m.

Session 302: Myofascial Release Clinical Applications -
Upper and Lower Body

Theresa Schmidt, MS, PT, OCS, LMT, CEAS, CHy

A continuation of the morning session, this course will continue the in depth look into the world of MFR. The focus will shift from the upper body to the lumbar spine and lower quadrant. Included will be descriptions, demonstrations, (video and/or live demonstrations) case reports and discussion of results.

Saturday, July 30th 7:30 a.m. - 11:30 p.m.

Session 303: Manual Lymphatic Drainage Introduction I
Carmen Thompson, BS, LPTA, CMT, CLT

Therapy that specifically targets the lymphatic system is cutting edge and the results are significant, measurable and very often, quickly achieved. This lecture provides an overview and practical clinical knowledge of manual lymphatic therapy (MLT) for patients with pain and/or orthopedic impairments. Participants will learn the anatomy and physiology of the lymphatic system and how it impacts a variety of diagnoses, the indications for and contraindications to MLT and how to apply proper manual lymphatic techniques. Participants will look at their patients with a new set of glasses and a new set of tools to use immediately in clinic.

Saturday, July 30th 1:30 p.m. - 5:30 p.m.

Session 304: Manual Lymphatic Drainage Introduction II
Carmen Thompson, BS, LPTA, CMT, CLT

Building upon the morning session, this course will continue the in depth look into the world Lymphedema. Special considerations will be given to a review of related lymphatic anatomy, the attendee will learn a basic face and neck sequence that can be used for multiple interventions such as, sinus congestion, acne, wrinkles, vertigo, dry eye, eye swelling, facial swelling due to trauma, migraines and more. This course offers a take away technique that can be immediately implemented into practice.

Sunday, July 31st 8 a.m. - Noon

Session 305: Pharmacology Considerations in the
Lymphatically Impaired Patient – The
Rehabilitative Phase of Recovery
Suzanne L. Tinsley, PhD, PT

Rehabilitation professionals often encounter patients prescribed a multitude of medications used to treat a variety of disease processes. This seminar will use case examples to present a brief summary of some of the medications often seen in a patient with a compromised lymphatic system and to demonstrate the relationship between a patient's medications and therapy. Stress will be placed on medications used in the rehabilitative phase of recovery of wound healing and lymphedema.

COURSE DESCRIPTIONS

TRACT 3

Jon DeBord, MS, PT, ATC, SCS is the owner and managing partner of Kewanee Physical Therapy and Rehab Specialists where he provides a sports-medicine outreach program at several area high schools, and has done extensive community and professional education in the areas of sports medicine and orthopedic injuries and rehabilitation. He received his Master of Science in Athletic Training from Rocky Mountain University of Health Professions in Provo, UT, and is a Board Certified Clinical Specialist in Sports Physical Therapy. Mr. DeBord is an APTA Certified Clinical Instructor, a certified Examiner for the National Athletic Trainer's Board of Certification and serves on the Specialization Academy of Content Experts for the American Board of Physical Therapy Specialties.

Graceann G. Forrester, PT, DPT, CKTI is a practicing clinician, Certified Personal Trainer, Pilates instructor, and former instructor at Ithaca College. She is also a board member of Hope Unites, an "international ecumenical organization specializing in humanitarian aid and disaster relief". Dr. Forrester has taught educational programs to improve transportation and therapeutic positioning of disabled children in Port Au Prince, Haiti. Currently she serves on the Board of Education, as Curriculum Chair, for the Kinesio Taping Association, teaching throughout the US, France, Russia, the UK and Italy.

Michelle Lange, OTR, ABDA, ATP/SMS is an occupational therapist with over 20 years of experience in the area of assistive technology. The former Clinical Director of The Assistive Technology Clinics of The Children's Hospital of Denver, Ms Lange's work in assistive technology includes a broad range of roles and services. A well-respected lecturer both nationally and internationally, Ms Lange has authored 7 book chapters and over 100 articles and is the editor of *Fundamentals in Assistive Technology*, 4th Ed. Ms Lange is currently on the teaching faculty of the Rehabilitation Engineering and Assistive Technology Society of North America (RESNA) and is a member of the Assistive Technology Journal Editorial Board. She is a past RESNA Secretary, Member at Large, member of the Board of Directors, Education Chair and SIG-09 Vice Chair. Ms Lange is also on the teaching faculty of the University of Pittsburgh for the ATP/ATS Review Course. Serving on the Rehabilitation Engineering Research Center (RERC) for Wheeled Mobility Advisory Board, Ms Lange is also the former Editor of the Technology Special Interest Section of the American Occupational Therapy Association (AOTA). Ms Lange is a credentialed Assistive Technology Professional (ATP), Seating and Mobility Specialist (SMS) and is a Senior Disability Analyst of the American Board of Disability Analysts (ABDA).

Geoff Mosley, PT, NCS is board certified in neurological physical therapy from the American Physical Therapy Association Board of Specialties. He has earned Vestibular Rehabilitation certification at Emory University's annual course, as well as certification, from RESNA, as a Certified Assistive Technology Practitioner. Mr. Mosley has conducted rehabilitation research and is currently seeking publication for a study on body weight supported gait training. Mr. Mosley is an adjunct faculty member at University of Missouri, Missouri State University and Southwest Baptist University.

John W. O'Halloran, PT, DPT, OCS, cert MDT, ATC, CSCS is currently a director of physical therapy/sports medicine at Southeastern Orthopedics in Greensboro, North Carolina, and co-owner of GOSMC Properties, LLC, as well as owner of O'Halloran Consulting, LLC. In 1999, Dr. O'Halloran became credentialed with the McKenzie Institute in the mechanical diagnosis and treatment of the spine and is also a certified functional capacity evaluator in the Blankenship Method. His unique evaluation and treatment skills make him a sought after clinical instructor for physical therapy and athletic training topics. His wide range of clinical experience combined with his extensive knowledge in the fiscal management of physical therapy outpatient rehabilitation services make him a very knowledgeable and skilled instructor.

SPEAKERS1

SPEAKERS

speakers 2

Theresa A. Schmidt, MS, PT, OCS, LMT, CEAS, CHy is the president of Flex Physical Therapy and founder of Educise Resources, Inc. and has over 22 years of experience in orthopedic, sports and neuromuscular rehabilitation. Board-certified in Orthopedic Physical Therapy by the American Board of Physical Therapy Specialties, Ms Schmidt has previously served as faculty for several physical therapy programs, such as Touro College in NY, NY, at Nassau Community College and CUNY Queens College. She has presented nationally for the AMTA, APTA, International Dance and Exercise Association, American Council on Exercise, Council of Licensed Physiotherapists, as well as, regionally for the New York State Society of Medical Massage Therapists, and the New York College for Wholistic Health Education and Research.

Carmen Thompson, BS, LPTA, CMT, CLT earned a Bachelor of Science in Health Care Management, an Associate of Science in Physical Therapy and is a practicing Licensed Physical Therapist Assistant and Certified Massage Therapist, with a specialty certification in lymphatic therapy. Having completed a 140-hour certification course in Manual Lymphatic Drainage and Complex Decongestive Physiotherapy through the Upledger Institute, she now teaches lymphatic pathology treatment methods and MLD/CDP therapy nationwide. Additionally she educates professionals at the local and state level on the prevention and management of lymphedema in cancer patients and on developing lymphedema programs in acute care and subacute care.

Suzanne L. Tinsley, PhD, PT is an Associate Professor in the Department of Rehabilitation Sciences at Louisiana State University Health Sciences Center-Shreveport, Dr. Tinsley's expertise lies in the areas of neurological rehabilitation and medical pharmacology. She has presented nationally at APTA conferences as well as numerous continuing education seminars on the topics of rehabilitation and pharmacology. Very active in the Neurology Section of the APTA, she currently serves as Chair of the Stoke SIG, Neurology Section, APTA. Published in the area of rehabilitation and pharmacology, Dr. Tinsley has been honored as a Visiting Scholar at the renowned Valens Rehabilitation Clinic in Valens, Switzerland.

Andrea Wolkenberg, PT, MA, CKTI is a practicing physical therapist of 32 years. Andrea has a Bachelor's degree in Physical Therapy, holds a Master's degree in Medical Anthropology and is a Certified Kinesio Taping Instructor. Her clinical expertise is in manual therapy, having taken numerous continuing education courses with James Cyriax, Laurence Jones, John Mennell, Shirley Sahrman, Stanley Paris, John Barnes, and many others. She is currently the Director of Physical Therapy at Spine Options, a pain management center in White Plains, NY, specializing in the conservative treatment of back and neck pain in addition to her role as President of SPINE SOLVERS INC., her own company which provides physical therapy services to individuals, injury prevention and workplace safety seminars to businesses, and Kinesio Taping seminars to health care professionals.

SPEAKERS 2

preliminary schedule

Rehab Rally will offer up to 20 hours of live CEU credit through the design of three education tracts. Each tract will have an educational theme, however, participants will be allowed to "tract skip" if they see something that motivates them to attend. The preliminary schedule below is an outline of the events and times that each tract will follow.

Educational Tracts

- Tract 1:* Orthopedic/Sports Medicine
Tract 2: Geriatric Rehabilitation
Tract 3: Lymphedema/Myofascial Release

PRELIMINARY SCHEDULE

Thursday, July 28, 2011

Noon - 5 p.m. Attendee Registration

Friday, July 29, 2011

6:30 - 7:30 a.m. Attendee Registration in Exhibit Hall
Breakfast in Exhibit Hall

7:30 - 11:30 a.m. Sessions 101, 201, 301

11:30 a.m. - 1:30 p.m. Lunch in Exhibit Hall

1:30 - 5:30 p.m. Sessions 102, 202, 302

7 - 9 p.m. Rehab Rally Reception*

* Come mingle with your peers as our great exhibitor partners share the latest in products and opportunities with you. And don't forget that "passport", as you strive to fill your punch card for the "Passport to Prizes" giveaway scheduled to occur at lunch on Saturday!

Saturday, July 30, 2011

6:30 - 7:30 a.m. Breakfast in Exhibit Hall

7:30 - 11:30 a.m. Sessions 103, 203, 303

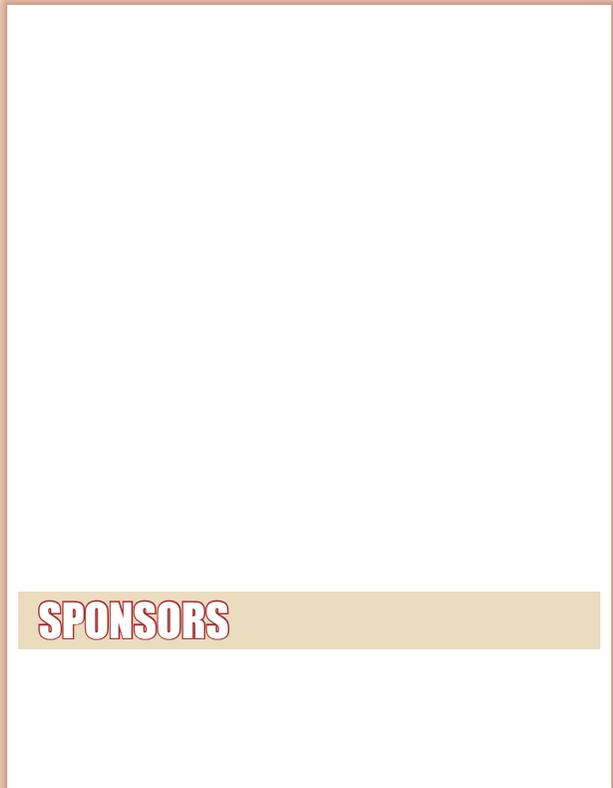

11:30 a.m. - 1:30 p.m. Lunch in Exhibit Hall
'Passport to Prizes' Announcements

1:30 - 5:30 p.m. Sessions 104, 204, 304

Sunday, July 31, 2011

Refunds will be granted until June 11, 2011, only when written notification is received. No cancellations will be accepted after June 11, 2011. A processing fee of \$175 will be charged for all cancellations. Refunds on cancellations will be processed after the Rehab Rally has completed. Substitutions will be permitted if received in writing by June 11, 2011. Confirmed registrants not attending the Rehab Rally will not be granted refunds.
