

IDIT Technologies Announces a New Release of the IDIT™ Software Suite

The new software release increases the business value and competitive advantages that IDIT provides to its customers

Oct. 25th, 2010 – [IDIT I.D.I. Technologies Ltd.](#), announces today the general availability of **IDIT™ Software Suite** Version 8. The new software release delivers numerous functional and technological benefits, enabling [general insurance companies](#) to improve product development and sales capabilities with features such as Enhanced Customer Dashboard with Cross/Up Sale indications, fast track claims processing, and a wealth of additional features and technology enhancements.

IDIT™ Software Suite is built on modern [Service Oriented Architecture](#) (SOA), which allows the company to continually make significant functional and technological advances benefit general insurance companies around the world. The solution is component-based with core, country and customer layers that deliver greater flexibility, particularly as general insurers continually strive to keep up to date with new legislation and changing market needs.

Yoel Amir, CEO of IDIT Technologies commented, “Our continuous investment in IDIT™ Software Suite, backed by our insurance domain expertise, demonstrates our undisputed commitment for innovation, while increasing the business value we deliver to our customers. This efficient and powerful release contains features that will provide our customers with significant competitive advantages.”

Many leading analysts have reviewed IDIT’s capabilities and recognize it as a mature, proven, modern general insurance solution. “Many insurers still face serious technology constraints on their new business growth aspirations. Tackling this legacy challenge is now a viable option for insurers, given the modern [policy administration systems](#) in the market.” said Catherine Stagg-Macey, senior insurance analyst at [Celent](#)’s London practice.

New in IDIT™ Software Suite Version 8 includes:

- Enhanced Customer Dashboard with Cross/Up Sale indications
- Integration of Business Process Execution Language (BPEL) and tools for process modeling
- Google Maps integration for risk-object accumulation analysis
- Straight-through fast track claims processing with follow up agenda
- Support for claims with no policies
- Support for Claim-Supporting Documents
- Upload of structured data via electronic forms created by Word templates
- Enhanced Product Rule Engine simulation capabilities
- Enhanced Product Factory productivity and promotion tools
- IDIT™ real-time performance monitoring
- Enhancements to existing IDIT™ clustering solutions & migration
- An Enhanced Field Metadata/Validation Wizard

IDIT™ Software Suite is aimed at general insurance companies looking for a new breed of general insurance solution that is both proven and mature, but that also provides flexibility, scalability and the ability for businesses to maintain their individuality and unique market differences.
