

MobileTrak3[®]

There's no space too small...

Have a small space that you need to maximize storage in? Think that you don't have enough room or overhead clearance for a MobileTrak® System? Think again.

Introducing our new MobileTrak3® System. All the same great features of our MobileTrak5®, but perfectly suited for smaller applications. It also has some new features that you won't find on our MobileTrak5®... yet.

First, a recap.

Ok, so the MobileTrak3® looks like an identical twin of the MobileTrak5®. And in a few ways it is. First off, it is still a system that eliminates all but one aisle from traditional shelving systems and makes all of the carriages movable.

Next, it's available in mechanical assist, manual, and electric versions. It can also be installed grouted or non-grouted, depending on your needs.

But don't let it's handsome good looks fool you, this little system has some great benefits over it's bigger brother.

You'll be floored.

With the MobileTrak3® you have the ability to continue your existing flooring across the decking to create a seamless look. Or you can opt for our standard polyvinyl decking or unfinished decking.

A turn for the better...

We're rolling out our new system with a brand new designer handle. Made from heavy duty high grade polymer, this handle features a push button aisle locking system and easy turning to make moving your carriages even more convenient.

Aesthetically speaking.

The MobileTrak3® features an enclosed drive mechanism that is hidden behind our new, space efficient, thin profile end panels. This helps create a cleaner look to the front of the system.

On top of that, the end panel features an externally adjustable chain tensioner which eliminates the need to remove the end panels to adjust the chain mechanism. This means once the end panels are on, there's no need to ever take them off.

Watch your head.

With it's new, lower profile design, the MobileTrak3® makes it easy to create a high density storage system in areas with low ceilings, obstructions, or sprinkler systems.

The advantage to this is that you can still fit the same amount of tiers in a shorter space.

Shown on the left, MobileTrak5®, on the right, MobileTrak3®.

Shown with one piece melamine end panels and polyvinyl decking.

If you've got it, we can store it.

The MobileTrak3® is available in carriage lengths up to 20 feet and widths up to 36". Like it's bigger brother, it's compatible with all of our shelving lines.

Another similarity between the MobileTrak3® and the MobileTrak5® is it's ability to store just about anything, not just files and paperwork. Use any of our great accessories to store anything from cleaning supplies and small parts storage, to yarn, archival boxes, guns, and more.

Need even more storage?

Not to worry, for larger capacity projects Datum offers the original MobileTrak5®.

Designed for large capacity and heavy duty storage, the MobileTrak5® can handle most any workload. Great for storage projects when overhead clearance is not an issue and large carriages are needed.

Compatible with all of our shelving lines and equipped with options like handles, paint and laminate, we can construct a MobileTrak5® unit to fit any storage need and any decor.
