Plus Computer Solutions Ltd. Completes Successful Sage ERP Accpac Implementation for TintinaGold Resources

International mining operation benefits from strong accounting solution implemented by Sage business partner Plus Computer Solutions.

Vancouver, British Columbia—May 3, 2011—Plus Computer Solutions has implemented a complete business management solution based on Sage ERP Accpac for TintinaGold Resources Inc., a growth company focused on the exploration and discovery of precious and base metals. Plus Computer Solutions is a premier Sage Authorized Partner specializing in the Sage ERP Accpac and SageCRM family of products.

As a company with an aggressive growth trajectory, TintinaGold sought a scalable, powerful ERP solution that would sustain its current operations and support its future expansion. They had been using QuickBooks®, but their multi-company, multi-currency operation had outstripped the capabilities of that program.

Wylie Hui, CFO for TintinaGold Resources said, “We needed an enterprise resource planning (ERP) system capable of aligning with our business processes and growing with us. We spoke to several other similar companies to see what they were using and found that a lot of them were having success with Sage ERP Accpac.”

After deciding on Sage ERP Accpac, the company then interviewed two vendors before selecting Plus Computer Solutions. “Plus Computer Solutions impressed us; they have lots of experience with mining companies, so they quickly understood our business model and our vision,” Hui said. “Their support and implementation services are excellent – and we like their fair and affordable fixed price model.”

The solution implemented by Plus Computer Solutions delivers the expanded functionality required by this publicly-traded corporation, including: role-based security; detailed audit trails; GAAP, FASB, and IFRS compliant operations; multi-currency, payroll, and a component that provides secure digital signatures on accounts payable checks.

Strong financial reporting capabilities within Sage ERP Accpac enable the company to spend less time gathering vital financial metrics and more time analyzing and monitoring those metrics. Budgetary information is easily available to the company’s various project managers which helps ensure projects stay on track.

Hui credits Plus Computer Solutions for their role in the successful transition: “We appreciate their problem-solving approach. Plus Computer Solutions offers ideas and suggestions without ever being pushy. We can tell they have a stake in our success and want us to get the most value out of our investment in technology.”

About TintinaGold

TintinaGold is a growth company focused on the exploration and development of precious and base metal properties around the world. The Company’s experienced Board of Directors and Management Team, having completed the verification drilling on the Sheep Creek copper-cobalt massive sulfide property in Montana, U.S.A., are focused on additional exploration drilling and advancing the project towards production. The Company is also exploring an impressive portfolio of gold and base metal projects in Alaska, including the Colorado Creek gold project located in southwest Alaska in the same region as the 40 million ounce Donlin Creek project.
