The **HD2600** is the latest generation in our long line of Industrial DVD Players

We made some major upgrades to our newest model

- The **HD2600** now has an active HDMI output
- A built in "up-scaler" outputs 720 or 1080i resolution
- We added an IR jack on the back of the player
  - Many control systems can now interface with our players
  - Connect an IR extension cable to allow remote use even if the player is enclosed
  - External DV-69K board is available to connect buttons/switches to control player
- The **HD2600** now has 5 modes
  - Mode 1 - Auto plays and repeats the largest title of the disc
  - Mode 2 - Auto plays and repeats all titles of the disc in order
  - Mode 3 - Standard, manual disc operation
  - Mode 4 - Auto plays and repeats discs that won't auto start with mode 1 or 2
  - Mode 5 - Pending
- Automatically powers up, plays and repeats, after a power loss
- A new higher reliability loader (we estimate it's life span to be about 4 years)
- The warranty has been extended from 15 months to 18 months
- Smaller size - the **HD2600** is only 9" deep x 7 3/8" wide x 1 7/8" tall
- The internal loader (\$168) can be changed without any tools
- We have improved the ability to read all discs (burned or main stream)
- Each player comes with it's own remote
  - Although not typically needed to operate the player
- Players can be operated vertically and horizontally.
- Almost no heat generation and comes with a slim power pack
  - Comes with an external mini power supply
  - Power pack only takes up 1 outlet on your power strip, or wall socket
- Changeable "Splash" screens
  - Commercial customers can now change the "Splash Screen" (video screen that plays when no disc is playing). You can capture your own screen from a DVD or a use a basic blue or black screen.

## Testimonials

We have DVD players scattered throughout a massive property in retail and promotional areas. In the past, after a power interruption, a technician would have to physically walk to each location and power the units on. The units are not located in the most ideal locations. The life expectancy was only several months. We purchased our first Videotel DVD player several years ago and have not touched it again. I have since replaced all the units with Videotel players. The new V2200 is more compact and easier to place in tight areas. It has one simple job – PLAY, REPEAT. It is a great product at an affordable price!

**Gregory Houle**  
Audio Visual Manager  
Foxwoods Resort Casino / MGM

Installed them both the same day we received them. Installed the disc, pushed the power button...that was the last time I touched them. They are awesome.

**Jeff Becher**  
Director of Engineering  
Renaissance Marriott

Fortunately, we decided to purchase your wonderful DVD players for use with our exhibition displays. They are user friendly and have addressed a major need for low profile decks in our galleries. I've never been as pleased with a new piece of gear as I have been with Videotel DVD players. I look forward to the advancements I've read about on your website, including HDMI ports on DVD players and/or Blu-ray or other HD type of players. We look forward to many years of use with your decks and I appreciate your follow up. Yours is an example of a quality company producing a quality product.

**John O'Shea**  
Audiovisual Coordinator  
Asian Art Museum & Chong-Moon Lee Center for Asian Art and Culture (San Francisco)

We have had great success using your Industrial DVD player. We use it for an incredibly simple application, but the durability and reliability of your player is a requirement. I like the new look as well.

**Michael E. Black**  
Vice President  
Strike Industries, Inc.

In the past (3) years, our company TTC INC/The Travelers Channel has purchased about 60 DVD Videotel units. The company operates a 24 hour visitors channel called The Travelers Channel in hotels, the Videotel DVD player has been the answer to our prayers. The DVD player runs 24 hours a day, like a fine Swiss watch. And if there is a power outage, the unit comes right back on without a manual reset. The Videotel DVD player also plays all formats of DVD discs without any problems. I highly recommend these units to any one.

**Al D'Conti**  
President  
TTC INC / The Travelers Channel
