The vTerminal has an easy-to-use check processing screen along side credit card processing.

CHECK PLATFORMS

USA ePay supports multiple check processing platforms. Each platform can perform an array of solutions from basic ACH to Check Guarantee Service.

Checkgateway's staff are dedicated exclusively to verifying payments and delivering funds to our merchant clients. More than seven years of experience processing ACH payments.

Digital EFT Solutions, LLC provides leading edge payment services to businesses and financial institutions throughout the country.

ACH Payment Solutions is an organization whose principals have 50 years combined experience in the transaction processing arena.

Payliance specializes in Payments, Risk Management and Recovery solutions for many industries; they also have strong capabilities across many ACH types.

Since 1983 CrossCheck has been a leader in check approval and guarantee, offering special services for any type of merchant business.

WHAT IS USA eCHECK?

USA eCheck service delivers a streamlined check acceptance process, as well as eliminating returned checks and returned check fees, while reducing check fees and trips to the bank. It reduces paperwork and improves cash flow through faster closing, balancing and settlement.

Designed to mirror the credit card transaction process solution, our electronic check verification service converts paper checks into electronic transactions at the point of sale and automatically deposits the funds into your account, utilizing payment terminals and the National Automated Clearing House (ACH) system.

USA ePay's eCheck solutions is pre-built into the gateway as an added feature. This allows any existing merchant to easily accept checks without having to worry about using a seperate program or console. USA ePay merchants access all their check processing capabilities and all their check reports from the same easy-to-use merchant console they use for their credit cards.

eCHECKS & DEVELOPER

USA ePay has made it easy for developer's to access check processing capabilities outside the merchant console. Check processing options are built into all of our available API's available for free download on the USA ePay website.

Now building check processing into your software is a simple solution.

Some available API examples are

- PHP
- .NET
- Perl
- Cold Fusion Tag
- Java
- ActiveX Control
- C / C++
- XML SOAP

just to name a few.

eCHECK BUILT INTO EVERY FEATURE

The USA ePay gateway is not only known for its simplicity in serving the merchant's basic needs but is also known for having the best features and functionality in the industry. That's why USA ePay has built-in the eCheck solution into all of our available features. Whether your merchant needs check capabilities in Recurring Billing, Batch Uploading, Custom Reporting, Fraud Prevention, Retail Software, or basically any other feature which USA ePay has made, the eCheck feature built-in. This is just part of our commitment to making sure that youre merchants get the solutions they need when they need it.
