

**NONSLIP • HIGH TRAFFIC
HIGH CHEMICAL RESISTANCE
IMPACT AND ABRASION RESISTANT**

QUARTZ SYSTEMS

Quartz

A very strong durable coating with extreme abrasion resistance that maintains a rough texture that conforms to all OSHA slip requirements. Great application in all commercial kitchens,

entry ways, industrial bathrooms, and heavy traffic areas. This is our main seller to customers for any commercial and industrial system. Unlimited color options for the quartz keeps the design options open for any decorative work.

FLINT SYSTEMS

This is primarily used in areas where extreme slip resistance and durability is needed. It's been used on exterior walkways, patios, entry ways and interior on forklift ramps for traction. The flint gives the system most of the durability.

What is Polyurea?

Polyurea is the latest advancement in coating technology providing the best of all worlds. Its extreme durability makes it 20x stronger than epoxy. It’s chemically resistant to salt, oil, gas and other harsh chemicals. It’s even 98% more flexible than epoxy, allowing for natural concrete movement – Polyurea will not crack or peel.

Polyurea has been utilized for over 25 years in industrial applications such as pipe / pipeline coatings and linings, water treatment plants, manhole & sewer linings, and automotive fascia OEM molded parts. In fact, if you are familiar with spray-on pickup truck bed liners, you are familiar with Polyurea. Fast cure times, flexibility, and abrasion-resistance are all inherent properties of Polyurea, making it a natural choice for the high demands on an average garage floor.
