MetaOption, LLC launched Goods Order Inventory System for iPhone

Goods Order is a free, inventory management system for the small business users and individuals willing to manage Orders, Inventory and Sales on mobile platform. It provides the flexibility to manage the products, orders, sales & inventory seamlessly on iPhone, Android & Nokia (Symbian) devices.

Jersey City, NJ (May 09, 2011) – MetaOption, LLC is proud to announce the launch of inventory management solution product "Goods Order Inventory System" on iPhone. Goods Order is a free, inventory management system for the small business users and individuals willing to manage Orders, Inventory and Sales on mobile platform. It provides the flexibility to manage the products, orders, sales & inventory seamlessly on iPhone, Android & Nokia (Symbian) devices. Features like report, sales tracking with/without inventory, and simple user interface provides the user to manage / track all the business data at any time & anywhere easily. Currently we are releasing the iPhone version, which can be downloaded from iTunes appstore and it is free of cost. **Android** and **Nokia** versions of Goods Order Inventory system will be released shortly.

Click on http://itunes.apple.com/us/app/goods-order-inventory/id433616596?mt=8&ls=1 to download "Goods Order Inventory" from iTunes.

After the release of Android and Nokia versions MetaOption is working on web integrated version of Goods Order Inventory System which is Goods Order Pro "**GOIS Pro**". "GOIS Pro" will offer many benefits over standalone version of Goods Order release currently. Follow the link http://www.goodsorderinventory.com/GoodsOrderInventoryPro.aspx to see some of the benefits of "GOIS Pro".
