√ 100% On Demand

√ Scalable Architecture

The PolicyStat Difference

+ **Superior Technology.** Anytime, anywhere on-demand service is built using the best available modern technology, enabling responsive product development.

+ **Leading Customers.** PolicyStat's solution is architected and priced to appeal to all size facilities from small clinics to major health systems.

+ **Proven Scalability.** Multi-tenant architecture allows for policy sharing across multiple facilities with ease, from a small physician's office with few policies to multi-facility health systems with thousands of documents.

+ **Configure vs. Customize.** Configurable features and workflow all on a single code base allows for us to push out new healthcare-specific features and functions with no disruption of service and no need for costly, time-consuming upgrades.

+ **Industry-Specific Solution.** PolicyStat has a single product focus: delivering specific and unique product requirements for the healthcare industry. All of our time, effort and product development is centered around keeping our customers delighted with our product and delivering them a document management solution that is truly unique and one-of-a-kind.

+ **Integration Capabilities.** Integrate with Active Directory for effortless user management and unified sign-on.

+ **Cost of Ownership.** With a true Software as a Service (SaaS) model, there is no hardware or software procurement required by your IT department. The solution is simply accessed by those approved users via a standard web browser.
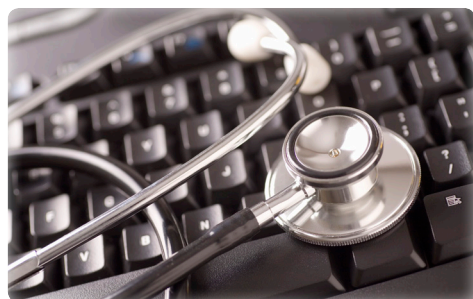

PolicyStat™

Policy Lifecycle Management Solution

Features:	Delivers:	Benefits:

Quick full-text searching
of documents, eliminating the need to know documents by title or department

A built-in approval workflow
facilitating timely review and approval by key personnel

A web-based architecture
providing access to all approved hospital team members anytime, from any web browser

A central document database
promoting consistency of care and improved clinical outcomes

Powerful reporting
delivering timely information and insight to support effective management decision-making

Data & educational services
enabling almost effortless implementation and quick and effective staff utilization

Improved quality of care
by providing a vehicle to push out healthcare "best practices" and ensure consistency

Increased productivity
for caregivers, document owners and approvers

Mitigated risk
by automating many of the steps needed to maintain accreditation and licensing and keeping an online archive of prior approved policies should anything ever go to litigation.

Easy to use!
Simple, intuitive and consistent so your caregivers can focus on what they do best.

Online access!
All information is readily available online for those approved users.

No paper work!
The software completely eliminates the need to print your policies, thus supporting your organization's "Green" efforts.

> "…PolicyStat has completely transformed the ongoing process of maintaining current and accurate policies and procedures, which is critical for the best clinical outcomes. We have been ranked in the top 5% of all hospitals nationally for the past three years, and now a complete electronic process for managing well over a thousand different policies helps assure we are compliant with applicable statutes and standards while making them easily accessible to any team member immediately. Policies are not helpful when they are on a shelf in an office two floors away."
