

About the Junebug Weddings team:

We're photographers ::: We're in love with beautiful photography, and before the launch of Junebug Weddings in July of 2006, we were full-time wedding photographers. Our experience with weddings gave us the impetus to bring something entirely new to the Seattle wedding market – a highly-vetted list of luxury wedding professionals that brides and event planners could trust.

We're wedding experts and authors ::: In 2001, we decided to expand our focus and learn everything we could about the process of wedding planning. We continuously reach out to other wedding professionals and couples to learn about the challenges they face, what decisions work best for them, and which businesses exceed their expectations.

We also contribute our expertise and images to numerous other wedding related websites, blogs, and magazines, and we completed a book about stress-free wedding planning for Globe Pequot Press called, *Planning Your Wedding: A Step-by-Step Guide to Creating Your Perfect Day*, which hit bookstores worldwide at the end of 2009.

Now we provide multiple award-winning editorial to our readers around the world while we bring savvy couples our [hot list of the best wedding photographers in the world](#) and our [top-ten hot lists](#) of the most talented and trusted wedding professionals in Seattle and Southern California. By combining our knowledge and personal experience, we bring a unique perspective to wedding planning.

We're girlfriends ::: We've been dear friends for many years now, and bond over our mutual love for fashion, beauty, and all things wedding related. We spend an inordinate amount of time together to innovate and collaborate on the success of Junebug Weddings and its member businesses, and to share and celebrate our love for fashion, food, helping others, art, and life.
