About

ERP Guru's Google Maps Integration for NetSuite capitalizes on Google Maps simple and intuitive mapping tools to show where your data is located on a global scale. Whether you want a global view of your leads, prospects, customers, opportunities, or any other record with an address, Google Maps Integration for NetSuite can do it for you.

Benefits

- Create maps from any NetSuite record with an address
- Customize the maps to show the data that matters to you
- Categorize mapped records by color, based on any criteria you want
- Display multiple maps directly on your NetSuite dashboard
- Color code a map of customers by revenue
- Plan your deliveries or next customer road trip

ERP Guru helps your enterprise grow by implementing and supporting NetSuite, the leading cloud-based business management software. With ERP Guru's team of outstanding software engineers, you will receive consistent, high-quality results.
