

KANEX AIRBLUE

Portable Bluetooth Music Receiver

The Kanex AirBlue™ is a portable Bluetooth-based music receiver that simply enables you to wirelessly play, listen and control all your favorite media from your iPod touch, iPhone or MP3 player through your home stereo or speakers.

Simply connect the receiver to your home stereo system with the included cables, and then pair your device to the AirBlue. Stream wirelessly to listen to, share, and control your music from up to 33 feet away. The AirBlue receiver uses Bluetooth v2.1 with EDR to provide you with high fidelity and premium sound.

Convenient and portable

Enjoy the convenience of portability by taking the AirBlue anywhere you go. Stream directly to an existing stereo, a friend's home entertainment center, or even in the car.

Control Bluetooth devices over AV

Share, control and listen to your favorite playlist or podcasts wirelessly using the Kanex AirBlue through your home-theater AV receiver or powered speakers using the included audio cable.

Charge via USB / Long-life battery

In case you're running out of juice, no cumbersome power supply is needed to charge the unit. Simply connect it to a USB powered device and start streaming your favorites over the air. With an average of 20 working hours, you'll have more than enough battery to keep your tunes playing all day long, no matter where you are.
