

INFO SHEET

WHAT YOU CALL AISLES, WE CALL WASTED SPACE.

ActivRAC™ Mobile Storage Systems are simple to install, easily handle property and evidence of different sizes and heights, and deliver instant organization and accountability.

Unlike the traditional static storage concept, mobilized storage systems require just one moving aisle that opens and closes only where and when needed to provide full accessibility to all materials for quick, safe retrieval. It's a simple solution inherently designed to maximize your space.

DOUBLE YOUR STORAGE CAPACITY IN THE SAME FOOTPRINT.

Whether you operate one lift truck or an entire fleet, ActivRAC™ Mobilized Storage Systems offer you up to 100% more storage capacity in the same square footage.

They can be customized and reconfigured to meet today's—and tomorrow's—evidence requirements. With all faces accessible, they provide 100% access to stored property and evidence, so they won't impair your chain of custody.

And with the extra space and storage capacity you gain, you won't need to build or require additional space.

Simply take your existing warehouse racks and place them on Spacesaver's carriages and rails, easily turning them into a mobilized storage system.

You can easily prevent unauthorized access to selected aisles or even the entire system. Optional TouchPad or key switch controls let you regulate access to restricted aisles.

PROPERTY ROOM SHELVING MOBILIZED TO BE ORGANIZED & EFFICIENT ... SO YOU CAN BE.

- Mobilize your existing racking or shelving.
- Most models install on existing floors.
- Convenient control operation (manual or powered systems).
- Motorized systems feature IR and RF remote control options – to open aisles while aboard a fork truck.
- Motorized systems feature optional TouchPad controls to regulate access to restricted aisles.
- Motorized systems include standard safety features that stop carriage movement when a person or object is detected.
- Capacity options of 7,000 lbs, 16,000 lbs or 30,000 lbs maximum load per rack section.
