PRESS RELEASE

PKA Technologies, Inc. receives WBE Status from the State of New Jersey

Suffern, NY, May 26, 2011: PKA Technologies, Inc., an HP Elite Partner, has been granted Woman-Owned Business Enterprise (WBE) status from the State of New Jersey. This status, along with our Women's Business Enterprise National Council (WBENC) Certification, reinforces PKA Technologies strategic direction in supporting the technology requirements of New Jersey State & Local Government Agencies. It also allows us to fully support Enterprise customers who have corporate initiatives to support Minority and Woman-Owned Businesses.

"PKA Technologies extensive experience with Fortune 500 companies and State & Local Government Agencies has prepared us to service both large and small government agencies in the State of New Jersey," said Felise Katz, CEO, PKA Technologies. "PKA, already WBE certified by the State of New York and New York City, will continue to expand our business by providing enterprise IT infrastructure services for State, Local and Education agencies. "

Now NJ WBE certified, PKA Technologies will be officially recognized by New Jersey State agencies and public authorities as a woman-owned business enterprise. PKA Technologies will be listed in the New Jersey Selective Assistance Vendor Information (NJSAVI), a database that identifies businesses that are registered as a SBE and/or certified as an M/WBE with the State of New Jersey. The NJSAVI marketplace identifies businesses eligible for mandated state programs such as the NJ Small Business Set Aside program, and aids in matching buyers and vendors for private contracting opportunities.

About PKA Technologies, Inc.

PKA Technologies, Inc., an HP Elite Partner, has been supplying IT technology products and services to Fortune 500, SMB and state & local government agencies since 1991. PKA Technologies, Inc., a certified woman-owned business, specializes in providing the next generation of IT servers, enterprise storage, networks and services.
