

The **eLektra Performance System™** Analog/Digital MIDI Virtual Instrument Software is the first software system designed especially for electric violinists who perform live.

For starters, the **eLektra Performance System** is a powerful digital effects hosting program that lets you carry an arsenal of CD-quality effects plugins in your laptop or notebook computer, and call these up on the stage or in the studio from the computer keyboard or a MIDI foot controller. The **eLektra Performance System** is software, so it's convenient, lightweight, and **green!** Digital multi-effects units will become e-waste when they're obsolete, but with the **eLektra Performance System**, you can build your own effects library and tweak your sound using the laptop you already have.

But that's only half the story. The **eLektra Performance System** lets your conventional analog electric violin (or pickup-equipped acoustic violin) become a low-latency MIDI controller compatible with hundreds of virtual instruments you can download free from the Internet, or purchase at music retailers. The **eLektra Performance System** instantly gives your existing electric violin thousands of new voices, opening a door to musical creativity never before available. Does the tune need a sax solo? No problem. Play it—on your violin!

The **eLektra Performance System** analyzes the real time dynamics of your playing (even tracks your vibrato!) so you can give synthesizers a unique *violin-like* envelope that sounds *bowed*. This means you don't have to sound like a keyboard synthesizer—you can take the violin into new territory without losing the personality of the instrument or your personal playing style. And all without buying a special "MIDI" violin!

Whether you're after mild enhancement of an acoustic sound, or are boldly taking our instrument to places it has never gone before, the **eLektra Performance System** will be a flexible and useful tool in your musical voyage.

eLektra Performance System is available exclusively from **Electric Violin Shop**
