

Canvas Systems Expands Maintenance Support within Retail Environments

Norcross, GA, 5/25/11 – Canvas Systems is proud to announce the expansion of their CanvasGuard IT hardware maintenance programs within the Retail Sales Industry. Through a strategic partnership with Tolt Service Group, a leading provider of infrastructure lifecycle management support for multi-site, multi-vendor customer facing technologies, Canvas is now able to support all POS (point of sale) systems hardware in addition to their existing support of enterprise data center hardware. This additional coverage allows Retail companies to consolidate multiple support contracts to a single support agreement for all hardware platforms. With Canvas’ multi-platform service capability a customer can have a single point of contact for POS and data center infrastructure. By consolidating multiple support contracts a customer can significantly reduce their maintenance costs while at the same time simplifying the support function and improving mean time to repair (MTTR).

“We are very excited about the expanded maintenance capabilities from our new partnership with Tolt Service Group,” says Paul Smith, Canvas VP of Support Services. “These added capabilities now allow us to provide a complete retail maintenance offering that is unmatched by any other IT hardware company in the industry. This further minimizes our customers’ risk through the cost-effective maintenance of their entire IT environment, not just a piece of it.”

About Canvas Systems:

Founded in 1998, Canvas Systems is the leading global and independent supplier of IT Hardware and Support – providing the largest channel alternative for data center and hardware services. Based in Norcross, Georgia, Canvas also has regional headquarters in the United Kingdom and Netherlands.
