ZEUS ELISA HSV gG-2 IgG Test System

Branchburg, NJ– May 27, 2011 – ZEUS Scientific announces it has received clearance from the U.S. Food and Drug Administration (FDA) to market the ZEUS ELISA HSV gG-2 IgG Test System (product number 9Z9781G). This new Test System is intended for the qualitative detection of type specific IgG class antibodies to Herpes Simplex Virus 2 (HSV-2) in human sera. The test is intended for testing sexually active individuals or pregnant women for aiding in the presumptive diagnosis of HSV-2 infection.

Many ZEUS ELISA Test Systems use a common procedure and share several common reagents, making automation simple and efficient. This allows laboratories to run multiple tests on the same plate, at the same time maximizing ELISA run efficiency and minimizing workflow. In addition, ZEUS ELISA Test Systems include patented SAve™ Diluent, a sample addition verification system designed to clearly identify patient sera is added to each and every well.

In conjunction with the AtheNA Multi-Lyte® HSV 1&2 IgG Plus Test System (product number A97101G), ZEUS Scientific now offers the clinical market multiple type-specific testing solutions for the qualitative detection of type specific IgG class antibodies to Herpes Simplex Virus 1 (HSV-1) and 2 (HSV-2) in human sera.

Both the ZEUS ELISA HSV gG-1 and gG-2 IgG Test Systems as well as the AtheNA Multi-Lyte® HSV 1&2 IgG Plus Test System are available for sale through the global ZEUS Scientific distribution network. Please visit www.zeusscientific.com to locate your local distributor.
