

WHERE IT'S APP:

WEST LAUREL HILL GETS WIRED

Throughout our history, West Laurel Hill Cemetery has embraced new trends and technology, always looking to provide families with new options, both special and diverse.

Whether it was the opening of our crematory in 1938, or our natural (green) burial section in 2008, West Laurel Hill has continually been on the forefront of innovative changes in cemetery services.

Following in this tradition, West Laurel Hill is helping to revolutionize the way families memorialize and rediscover their heritage with the development of an App.

What is the West Laurel Hill App?

The App allows you to use a hand-held device that will guide you from where you are to where your loved one is buried and to those family members buried nearby or in another area of our Cemetery.

How can the App help me memorialize my loved one?

The App connects a physical space with a digital memorial. Standing at a person's gravesite, family members can view photographs, stories, videos and an obituary for the deceased.

How will the App help me to connect with history?

The App allows visitors to choose different tours (or even create their own), and be guided from site to site in the cemetery enjoying the documented history.

How do I test out this new technology?

For those just fascinated with technology, stop in to use the App for fun and learn about the individuals who have chosen West Laurel Hill as their final resting place; their stories are unforgettable.

How can I create a memorial for my family member?

Contact our Family Services Department and we will help you through the process of selecting the materials to create an on-line memorial for your loved one.
