Bond International Software Releases StaffSuite Staffing Software with Enhanced Vertex Payroll Tax Processing Capability

Bond VCG StaffSuite® staffing software integrates enhanced Vertex payroll tax calculation engine to ensure staffing firms have employee payrolls of continued accuracy and reliability with minimized staff payroll department effort.

Atlanta, GA, June 1, 2011. Bond International Software announced today that the latest version of Bond VCG StaffSuite includes an update of its fully integrated payroll tax processing software to the latest release from partner Vertex. With growing government tax regulations comes an increasing need to monitor and respond effectively and accurately. VCG has collaborated with Vertex for many years to deliver accurate payroll tax calculations within its staffing software. The latest release of StaffSuite integrates Vertex's enhanced tax calculation engine that contains all the required logic, flexibility and always the most recent tax data available. With StaffSuite, staffing firms can consistently meet their employees' expectations of accuracy and reliability every payday.

This Vertex update allows StaffSuite to take advantage of a greater level of compliance with withholding methods and the ability to address a wider range of deductions and compensations encountered regularly in the temporary staffing industry. StaffSuite staffing software customers can subscribe to and receive automatic updates to their payroll tax software for every state that they do business in, which simplifies payroll administration and processing.

Steve Taylor, President and CEO of Bond VCG, said, "VCG's long relationship with Vertex has always been focused on enabling our staffing customers to rest easily, knowing that they were delivering accurate payrolls. This update continues that partnership with comprehensive and accurate tax calculations for all federal, state, and local taxes on all regular and supplemental wages for multiple work locations per employee."

About Bond VCG
