A Complete Rainwater Drainage System by Ornametals

Ornametals offers EuroGutterUSA™, a complete line of European-style, sustainable rainwater goods manufactured in the U.S. Featuring half-round gutter and seamless weld downspouts made from copper and VMZINC®, EuroGutterUSA™ includes a full line of complementary accessories such as hangers, brackets, endcaps, elbows and more.

Historic Restoration and Preservation

Ornametals fabricates, restores and preserves custom copper and zinc roofing systems, cupolas, finials, towers and other architectural elements for projects throughout the world. We utilize techniques that have been passed down for hundreds of years, along with modern methods and equipment. Contact us for more information about our restoration and preservation services.

Architectural Ornaments

While architectural ornaments embellish and adorn a building's structural design, they also form an integral part of a structure's framework. Types of ornaments include decorative pieces such as dormers, finials, leaderheads, panels, moldings, roof cresting and medallions, and also structural elements such as roof and chimney flashing, ridge and dormer vents, and chimney caps.

Working together with Kaufmann, GmBH and Umicore Building Products, Ornametals offers a full-range of architectural ornaments in copper and VMZINC® including dormers, finials, leaderheads, panels, moldings, roof cresting, medallions, roof and chimney flashing, ridge and dormer vents, and chimney caps. Ornametals offers in-stock "standard" sizing, and can also custom design and fabricate ornaments to specification.
