

PROFILES OF SUCCESS

Women & Infants Hospital  
Providence, Rhode Island  
Medical Record Storage

## Problem

The Women & Infants Hospital was relocating to a new building and was searching for a new filing system for their patient records. Their old mobile system wasn't going to fit in the new area, so they decided to start fresh and contacted Datum.

## Solution

Due to the low ceiling, the hospital needed a low profile shelving system. To accommodate this, Datum created for them a MobileTrak3® System equipped with ThinStak® Shelving.

The MobileTrak3® has a lower profile than the system they purchased previously from another company and ThinStak® is Datum's low profile shelving line. Combined, this new system gave them the storage capacity they were looking for and stayed within the height requirements for the lower ceiling clearance.

And by going with a MobileTrak® System, they were able to save valuable floor space for other uses.

Datum utilizes design programs to create 3D color renderings for customers to see exactly what their unique storage system will look like in their facility, from size and scale to color and aesthetic appeal, before the system is purchased.
