AARM Releases Updated Dry Powder Functionality

BOSTON, MA – June 6 –

AARM is pleased to announce the release of new functionality that offers truly meaningful and appropriate indices for the private equity industry. The *AARM FOIA Dry Powder Years™* and *AARM FOIA Dry Powder Percent™* are designed in collaboration with AARM Customer Advisory Board Members and show whether an investment strategy is overcapitalized at a particular point in time.

“AARM is privileged to have customers that provide valuable feedback, and is pleased to respond by delivering new tools that can support them with ongoing decision and portfolio management processes,” commented Senior Director, Nate Richards.

These new tools provide two unique indexes on dry powder not previously available in the market and only accessible using the *AARM AssetStar™* platform. Users are offered enhanced views of uncommitted capital trends over a ten year period (*AARM FOIA Dry Powder Percent™*), as well as, predictive analysis of how long it will take to deploy existing capital overhang (*AARM FOIA Dry Powder Years™*).

-MORE-

Alternative Asset Risk Management Corporation (AARM Corp) is the only provider of Insight on Demand for alternative asset investors. AARM Corp’s interactive on-demand platform empowers users to conduct due diligence, monitor portfolio allocations and manage risk of their private equity portfolios.

For more information call 1-877-296-AARM or e-mail service@aarmcorp.com

“Whereas existing services today allow investors to assess current industry statistics, this new offering enables users to make better investment decisions by incorporating leading indicators of dry powder utilization.” said Laurie Qian, of AARM. **“We are dedicated to achieving new standards for innovation and are proud to provide a flexible, on-demand solution to meet our customers’ needs.”**

This significant evolution in the AARM platform is coupled with AARM’s leading *AARM FOIA Benchmarks*™ as part of the Industry Insights module.

About AARM Corporation

Alternative Asset Risk Management (AARM) Corporation is the only provider of *Insight on Demand*™, investment and risk management solutions for investors in alternative assets. AARM Corp’s web-based tools enable investors to streamline their private equity investment processes and optimize the value of their portfolios. AARM Corp’s revolutionary interactive platform allows users to evaluate prospective investments, engage in active asset allocation and portfolio management, and manage risk. Users can benchmark fund performance, conduct manager due diligence, create customized reports, run “what if” scenarios, and identify industry trends.
