

Take photo strips on-the-go with Photo Booth – Brand new and unique for BlackBerry® Smartphones

Photo Booth for BlackBerry® Smartphones is a handy and fun application for making fun pictures. This application enhances the BlackBerry® camera by adding extended functionality in the form of saving style, and automated picture taking.

Hong Kong, (PRWeb) June 10, 2011 – Anyone frequently taking pictures with his or her BlackBerry® Smartphone knows that it takes some patience to shoot a good photo. When photographing a landscape, no problem. But when trying to capture action in the heat of the moment, patience can be scarce. Photo Booth solves this problem.

S4BB Limited, nominee at the *Global Mobile App Awards 2011*, developed a new, fun photography app; “Photo Booth”. This unique application is the mobile variant of the well known photo booth one can find local malls, this one's portable, available anywhere and anytime.

Photo Booth allows BlackBerry® users to take strips of four photos. All that is required is to hold the phone still and make a funny face, the application does the rest; focusing, determining whether a flash is needed and then shooting the photo. The photos are then saved in strips of four. In the gallery, users can either view the complete strip, or zoom in to one picture. In the options menu it is possible to customize the menu layout and set the time interval in between the shots, as well as choose the frame color.

Photo Booth is compatible with all current BlackBerry® models running BlackBerry® OS 5.0 and higher. This includes the brand new BlackBerry® Torch™ 9800, BlackBerry® Bold™ 9780, BlackBerry® Style™ 9670, BlackBerry® Storm2™, BlackBerry® Curve™ 3G 9300, 9330.

As an introduction offer Photo Booth is currently available on BlackBerry® App World and Mobihand with a discount of 40%, reducing the price to only \$2.99. For additional information about Photo Booth, visit <http://www.s4bb.com/software/photo-booth/>
