

FOR IMMEDIATE RELEASE:

Classic Diagnostic Imaging, LLC Earns ISO 9001:2008 Certification

(Macedonia, OH June 8th, 2011) Classic Diagnostic Imaging, LLC, a world leader in medical imaging components and refurbished equipment, received its ISO 9001:2008 Management System certificate on May 3,2011.

This certification is the result of the hard work, dedication, consistent quality products, and the outstanding leadership and staff of Classic Diagnostic Imaging.

“This achievement provides evidence to customers, suppliers, and employees of our commitment to producing a quality product, and providing consistent customer satisfaction”, says Melanie Moss, Controller & ISO Management Representative.

To earn their certificate, Classic underwent an intensive process that included quality management system development, review, internal audits, and pre-audit activities, culminating in a comprehensive two-day registration audit by SRI Quality Registrars.

ISO 9001:2008 is process-based; certification recognizes organizations that can link business objectives with operating effectiveness. Companies that achieve management system certification to ISO 9001:2008 have demonstrated effective implementation of documentation and records management, top management’s commitment to their customers, establishment of clear policy, good planning and implementation, good resource management, efficient process control, measurement and analysis. Continual improvement has been demonstrated.

“Achieving ISO 9001:2008 certification is a testament to the quality of products we provide”, says President Edward Rawley, “Nothing leaves this building without passing our quality checkpoints”.

To maintain certification, Classic will perform semi-annual internal audits to ensure compliance and assess opportunities for improvement company-wide.

Classic Diagnostic Imaging’s Vision:

Classic Diagnostic Imaging, LLC is a global leader in providing new, used and refurbished components for medical imaging equipment. We provide complete, turnkey solutions for hospitals and doctors, providing not only the components, but also new, used and refurbished equipment.
