

Dade Moeller & Associates (Dade Moeller) is proud to be able to introduce you to a new range of medical physics services we offer, and to remind you of our existing radiation safety program support services. Dade Moeller is now able to provide you complete radiation safety program management and support services. Minimizing radiation doses to workers and patients is very important. Compliance with federal and state regulations is required. Our staff is ready to assist you in assuring your operations are conducted to accomplish these goals.

DIAGNOSTIC AND THERAPY SUPPORT SERVICES

We can provide physics coverage and clinical support for therapy departments including chart checks, brachytherapy and routine quality assurance. We can also provide support during busy clinical times, either due to increased workload, installation of new equipment or vacation coverage. In addition we have licensed inspectors who can perform the required state inspections for linear accelerators, tomotherapy, simulators and diagnostic units. We can assist with licensing and accreditations the American College of Radiology (ACR) or the Intersocietal Accreditation Commission (IAC) and other accreditation bodies. Additionally, we can design or provide reviews of quality management programs, and provide clinical reviews of your department to suggest methods for increased patient safety and efficiency.

RADIATION SAFETY PROGRAM MANAGEMENT

Our staff is experienced in both managing and assisting in all aspects of Medical Radiation Safety Programs and Radiation Safety Committees (RSC). We can serve as your temporary RSO during employee changes and provide additional radiation safety staff. Let us draft or peer-review your radiation safety plan, policies and procedures, and license documents. Leave the RSC meeting agendas and minutes to our professionals.

RADIATION SAFETY PROGRAM SUPPORT

Dade Moeller offers you a full and complete package of radiation safety and regulatory compliance services. Whether you are a large network of healthcare providers or a small local clinic, we will provide you comprehensive and personalized service to help you prepare for inspections by the Nuclear Regulatory Commission (NRC) or Agreement State regulatory agencies. In addition, our experienced and qualified professionals offer:

- Radiation shielding and dose calculations,
- Radiation monitoring badges and dosimetry program management,
- On-site audits and pre-inspection reviews,
- Radiation safety surveys,
- Radioactive material inventory services,
- Leak test sampling and analysis,
- Radiation detector calibration, and
- Radioactive waste management.

RADIATION SAFETY TRAINING

Our popular Dade Moeller Radiation Safety Academy offers classroom, online, and on-site training. We offer Medical Radiation Safety Officer training and many others. Some courses are approved for CAMPEP, SNMETS/ARRT and other CEU's. From Cardiologists and Radiation Oncologists to the maintenance and housekeeping staff, we have the training available to keep your staff and program in full regulatory compliance. Choose from our highly rated standard courses or customize the training sessions to meet your specific needs. Our courses can be used to fulfill regulatory requirements, provide required CME credits or to assist with preparation for board certification for all personnel.
