

# Net2Mail Digital Fax Engine

The Bridge Between Legacy Fax and Today's Technology Solutions

## KEY BENEFITS

- **Mobile:** Fax messages are sent to your inbox, meaning you can access it anywhere and anytime
- **Cost-Effective:** No more fax machine and repairs, fax line, toner replacements, and paper costs
- **Reduced Clutter:** Archive online within your email inbox through digital folders
- **Convenience:** Fax a digital file from your computer without having to print it out first for a fax machine
- **Scheduled Faxes:** Fax documents

CHT Global is the wholly-owned US subsidiary of Chunghwa Telecom, the largest telecommunication company in Taiwan. Since 2002, CHT Global has helped numerous enterprises achieve their targeted goals while reducing customer side complexity by providing industry leading multi-site network solutions through its global backbone infrastructure and world-class service.

For additional products and services information, please contact CHT Global at 1-888-998-1898, or visit [www.net2mail.chtglobal.com](http://www.net2mail.chtglobal.com).

One of the most compelling small to medium business solutions on the market is fax to email digital conversion tools. Today we are in an age where old but legacy technologies are converging with new and more flexible solutions. CHT Global's Digital Fax Engine bridges the gap by leveraging new technology in digitization and the web to provide legacy services of fax.

## Cost-Saving

With the digitization of media communications, customer savings increase greatly by adopting these new technologies. One of the benefits of digital fax is that it replaces the legacy fax machine and all its associated extra costs. Typically, costs incurred from faxing is an aggregate of the machine itself, the fax phone line, a fax number, fax printing toner cartridges, and paper. With the Net2Mail Digital Fax Engine customers will be able to send and receive email using their computer and internet, without the need for an actual fax machine or a printer, replacing toner cartridges, paper waste, or even a fax phone line.

## Storage and Archival

Fax messages are sent to your dedicated fax number and then transferred to your email account as a TIFF image file. Once in your email inbox, you then have the ability to utilize email functions such as archiving into designated folders or forwarding the document. Thus the benefits range from not having to print out faxes but having a digital archive to store and search for received fax documents, and also the ability to forward them to coworkers or other parties.

## Convenience and Flexibility

Small to medium businesses will often demand convenient and effective solutions because creating business requires the ability to be flexible. Going paperless and being able to send and receive fax messages from anywhere and at anytime is one the greatest strengths of the Net2Mail Fax Service. Those traveling need only bring their laptop or other mobile device to connect to the internet and access their Net2Mail account. From the Net2Mail interface, they can then send out faxes or see what faxes they had received in their inbox.
