

## Choosing Change Workshop

Making Powerful Choices

### WHO SHOULD ATTEND?

The people in your company who guide and direct others.

The support of your Team is essential to achieving your organization's transformational initiatives. Acquiescence is not enough – their buy-in and commitment is key.

How to get your Team's whole-hearted support? Equip them so they can successfully guide themselves through the *inner changes* that the outer changes will require them to make.

### HOW AND WHAT YOU WILL LEARN

Using interactive exercises, case studies, discussions, and videos; our skillful and experienced facilitators will outline the details of The Three Stages of Change, along with a framework to help them move through the mental and emotional impacts of change. As the Team develops a solid understanding of change and the dynamics happening within each stage, they will also be given practical and proven strategies to deal with the challenges they'll meet along the way.

By understanding and knowing what to do during the change process – particularly the human dynamics behind it – your Team will have the confidence to get behind and support new initiatives. Furthermore, they will be able to take that knowledge and that sense of confidence and commitment, and instill them through the whole of the organization.

Knowledge ▶ Capability ▶ Confidence ▶ Commitment ▶ Achievement
