

Axeom from Xios Technologies

**Get more trades done with
Axeom.**

The Axeom Advantage

If you are keeping important information in manual notebooks or disposable spreadsheets then you are missing trade opportunities. Axeom captures and archives all inquiry, both voice and electronic, and compares it to inventory, customer portfolios, and bond holder information to quickly identify trade opportunities.

- Teams that span geographies are literally on the same page
- Communication between Sales and Trading is optimized
- Ability to set alerts via pop ups, IM or email
- Integrates with internal data, external data and leading OMS vendors
- Automates common Bloomberg tasks
- Automatically pulls in electronic RFQs

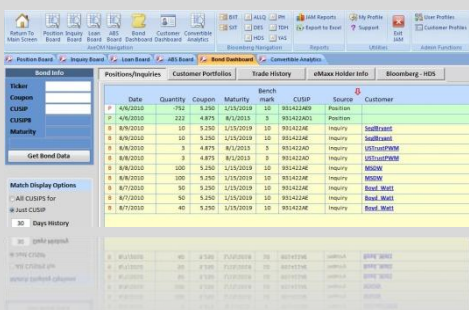

← **Axeom connects disparate data sources to uncover hidden opportunities.**

Key Features

Inquiry & Position Screens

- Spreadsheet style design and features for ease of use
- Customizable by user
- Speed buttons for quick filtering and sorting
- Electronic inquiries fed in automatically

Automation of Bloomberg Messages

- The construction of a Bloomberg message is automated (no more cutting, pasting and formatting)
- This popular feature greatly aids the user adoption of the application

Coverage

Axeom works with the following fixed income instruments:

- Corporate Bonds
- Munis
- Bank Loans
- CMBS
- CDOs
- CLOs
- Convertibles

Bond Dashboard

- Consolidates all information about a particular issuer or cusip
- All inquiries are matched against the following sources: inquiry and trade history, bond holders, and client portfolios
- Ability to identify equivalent bonds
