## METAGEEK PARTNERS WITH THE CONTROL4 SOLUTION PROVIDER PROGRAM

*Spectrum analysis tools and software help troubleshoot Wi-Fi interference for optimized Control4 installations.*

**BOISE, Idaho – June 23, 2011** – MetaGeek, a leading provider of hardware and software tools for deploying and maintaining wireless networks, today announced that they have joined the Control4® Solution Provider Program. The Solution Provider Program identifies and recommends products and services to enhance business management processes for Control4 dealers.

“Control4 delivers intelligent automation solutions that operate across the 2.4 GHz wireless spectrum,” said Ryan Woodings, chief geek and founder of MetaGeek. “This relationship provides Control4 technicians access to the tools they need to efficiently isolate, identify and troubleshoot wireless interference during implementation and beyond.”

Based in Boise, Idaho, MetaGeek develops a full line of portable USB spectrum analyzers and software designed to help wireless professionals more quickly troubleshoot interference across the 2.4 GHz and 5 GHz bands. This technology helps Control4 installers mitigate wireless interference issues and achieve optimal automation performance, which minimizes troubleshooting time and limits customer callbacks.

“MetaGeek products are a great tool for our dealers,” said Jim Arnold, senior vice president of sales for Control4. “They offer visibility into the wireless landscape so Control4 solutions can be deployed for maximum performance – without disrupting, or being disrupted by, existing wireless devices and networks.”

With tools that assist in sales, marketing, installation, application development, and business operations, Control4 Solution Provider companies help dealers differentiate their business in the marketplace, increase their profitability and be more successful selling Control4® solutions.
