Operating rooms frequently have infusion or irrigation fluid leak onto the floor during urological, orthopedic and gynecological surgical procedures. These standing fluids can cause O.R. personnel to slip and fall, as well as electrocution and bio hazard exposure. Our pad is designed to eliminate fluid collection thus increasing the level of safety in the operating room.

REMORA EXTRACTION PAD

Will continuously evacuate fluids flowing from the O.R. table and/or standing fluid off the floor.

Evacuates 3.7 Liters per minute.

Can be easily repositioned.

Thin enough to slip under equipment.

Saves on the cost of towels and linens

Can be stepped on without affecting performance.

Easily connects either to our Accu-Pump or standard O.R. vacuum canister.

Cost effective and disposable.

Quiet technology allows use during surgery without interference or distraction.

Patent Pending
