## PROFESSIONAL SERVICES SUMMARY

The CoreBlox Professional Services team focuses its practice on enterprise security and technical support operations. We leverage 35+ years combined experience to provide the analysis, solutions, and optimization strategies necessary for companies to complete their current initiatives in these areas while planning for future growth. CoreBlox has built successful relationships with Fortune 1000 companies because of our knowledge, our work ethic, and our commitment to client satisfaction.

## EXPERT OFFERINGS

### Identity and Access Management Consulting

CoreBlox can assist with all phases of IAM (Identity and Access Management) deployments. We have experience with a wide range of IAM technologies and protocols, including:

- Single-Sign-On and Access Management
- Identity Management
- SAML & identity federation architecture
- User directory virtualization

### Enterprise Security Strategy Recommendation/Audit

The CoreBlox team can analyze and document your environment and present you with the optimal strategy to accomplish your goals and satisfy any compliance requirements.

### Dedicated CA SiteMinder Professional

CoreBlox can provide a dedicated resource to augment your existing security team. Your dedicated resource would work to gain a thorough understanding of your environment and your business objectives in order to provide targeted advice and assistance from the most knowledgeable SiteMinder resources available. This role may be filled in an on-site or a remote capacity based on your needs and budget.

## 1 Diverse background

The CoreBlox team has experience in all phases of IAM implementations, from initial planning and design all the way through to post-deployment support and troubleshooting.

## 2 IAM Experts

CoreBlox has a successful history of delivering quality IAM system architectures and successful deployments. The core team originated from Netegrity and has over 35 years of combined experience.

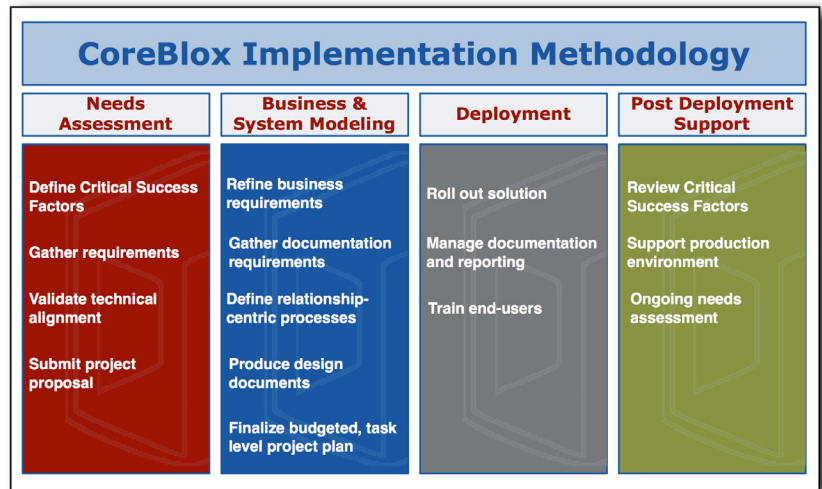

## 3 Proven Track Record

The CoreBlox team has assisted companies secure applications of all sizes. Whether it is tens of thousands of users or tens of millions we have a proven track record of client success and satisfaction.

## PROJECT APPROACH

Our project approach is practical and disciplined. We will leverage best practices while adopting them to your organization's needs and culture.

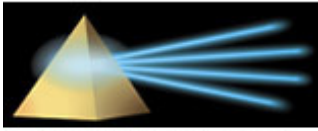

The CoreBlox implementation methodology enables us to execute successful, timely, low-risk projects. We provide your implementation team with a number of essential documents to ensure that everyone is aware of the latest accomplishments, budget numbers, upcoming tasks, and risks.
