

LUXADD T12 to T5 express Retrofit Kit

LUXADD - More Light, Less Energy!

In today's world many businesses and households are more and more concerned about their energy expenses and the ecological foot print left by them on this globe. This number is a vast improvement compared to 10 years ago. However, in most cases, being energy efficient comes with a huge price tag and the amortization time frames (i.e. in solar energy) are too long to include such products on the shopping list of a cost effective business or household. Most energy consumers like instant savings and would like to provide better care for the environment, but their pocket book does not allow for such expenses.

Our **LUXADD** retrofit products will combine your environmental conscious with your economic consciousness. They will provide you with energy savings between 40% to 75% depending on the use and installation and therefore will achieve amortization time frames for household managers as well as Chief Financial Officers with even the sharpest pencils.

With our **LUXADD** retrofit products you can improve your balance sheet and help the environment at the same time when it comes to your electricity spending. Additionally, energy prices are sensitive to political and economic instabilities, environmental concerns and changing supply and demand. Energy prices can quickly rise, adversely affecting business by driving down profit margins. In addition, some countries, i.e. the USA, are entirely phasing out old, energy wasting lighting technology with magnetic ballasts "**T12 Phase out in 2012**", another reason to act now.

With our ground breaking **LUXADD** technology you can prepare for the future, start saving from the day one of installation and have a better lighting quality for your employees, clients or family members. You will also like, that the concept of our **LUXADD** retrofit products derives from German technology, but they are engineered and "**made in USA**".

LUXADD T12 to T5 express Retrofit Kit

LUXADD - More Light, Less Energy!

INSTANT SAVINGS

The **LUXADD T12 to T5 express Retrofit Kit** (Conversion Adapter) is designed to retrofit old 12 fluorescent light tube fixtures (magnetic ballast), to the newest technology of T5 fluorescent light tube fixtures (electronic ballast). The upgrade from an old magnetic T12 fixture to a new electronic T5 fixture results in instant energy savings of 40%-75%.

INSTALLATION AS EASY AS 1-2-3 (No downtime - no labor costs)

One of the great advantages of the **LUXADD T12 to T5 express Retrofit Kit** (Conversion Adapter) is that the existing magnetic ballast does not need to be replaced or bypassed, as usually done with conventional retrofits. This feature allows for quick and easy conversion with practically no labor costs. The installation of our **T12 to T5 express Retrofit Kit** is as easy as a lamp change, requires no specialist, anyone can do it and is completed in minutes.

GOOD FOR YOU AND THE ENVIRONMENT

Our **LUXADD T12 to T5 express Retrofit Kit** (Conversion Adapter) operates with high frequency electronic ballast and eliminates entirely the dangerous strobe effect (eye-tiring flickering). In addition, the T5 lamp contains less mercury and the electronic ballast produces less heat than the magnetic ballast resulting in energy savings for air conditioning of up to 15%.

*Advantages of the LUXADD
express Retrofit Kit: "Instant
energy savings 40-75% - Less
than 3 minutes installation time
- Less than 1 year payback!"*
