Hall of Famer

SHOTVISION  
HIGH PERFORMANCE GOLF & SPORTS APPS

SHOTVISION is the most innovative digital golf instruction developed: 5X HD red camera footage, delivering multiple angles per shot, dynamic instructional graphics, and a custom video player to bring it all together. The free app delivers ten golf instructional videos from SHOTVISION Pro golfers, including Se Ri Pak, J.B. Holmes, Brad Faxon, Fred Funk and Brian Mogg.

[www.shotvisionpro.com](http://www.shotvisionpro.com)

**SHOTVISION** was created out of the frustration from the limited and linear delivery of golf instruction. Golf does not have to be difficult and require beating hundreds of golf balls on the driving range. Your mind is a powerful machine and can learn through visualization. The richer and more vivid the imagery, the quicker and more effective your brain will learn correct movement.

In physical practice, you spend the majority of the time performing less than perfectly and as a result, you end up practicing how to hit poor golf shots. In rich imagery practice, every shot is perfect. This is why every **SHOTVISION** video was shot on RED digital cinematography camera. RED is over 5 times the resolution of an HD camera, which means super rich texture and depth, with over 100 frames per second detail.

In combining RED video footage with high-end motion graphics and concise instruction, **SHOTVISION** has created golf instruction so mesmerizing that you want to watch it over-and-over, transforming you into a high-performance golfer.

The **SHOTVISION** custom video player allows the user full control of viewing options, including:

- Play mode speed control options
- Frame-By-Frame forward and backward
- Change angle view of the same shot, by pressing the camera icon in the video player. (Paid Version Only)
- Over 100 video shots per player. (Paid Version Only)
- View each golf video with or without instructional text graphics, just click on the appropriate icon in the video player header. Note: video with instructional text graphics only plays in landscape or horizontal position. (Paid Version Only)

## Three Ways to Get the FREE **SHOTVISION** Golf App:

1. Download it at the App Store:

2. Type the following into your phone's browser:

[www.shotvisiongolf.mobi](http://www.shotvisiongolf.mobi)

3. Scan **SHOTVISION**'s QR code with your phone to launch our mobile site.
