

Smart Places Feature List

Smart Places for Android provides complete automation of check-ins to Facebook Places. Itemized lists of features for both the free version and the unlocked/upgraded version of Smart Places are shown below.

Smart Places (Free Version)

- Notifications when friends check-in nearby.
- Map overview showing icons and messages for all nearby check-ins.
- List overview showing icons and messages for all nearby check-ins.
- Check-in screen with 1-click check-in, plus optional friend tags and messages.
- Widget (1x1) giving 2-click check-in access from home screen.
- Zones with automatic check-in to places of choice.
- Quick creation of zones from check-in screen or through intuitive map drawing interface.
- Time stats, including total and daily/weekly/monthly averages in places.
- Option to append time stats to check-in messages.
- Multiple location options, including WiFi, GPS and custom tap on map.
- Extensive configuration options for notifications and auto-check-ins.
- Surprise after 3 friend referrals.

Additional Features Unlocked by The Smart Places Key

- Automatic check-outs which delete a check-in and/or post a wall message when leaving a zone.
- Widget (4x1) showing the latest nearby check-in with icon, place, time and message, plus a check-in shortcut button.
- Priority places: nearby places previously checked into are shown instantaneously in the check-in screen and remain at the top.
- Time targets allow to set the intended amount of time to spend in a zone, e.g. at the gym, during a period of time and to graphically monitor progress.
- Advanced check-in and check-out messages containing custom time stats for a zone, e.g. “Left %PLACE after %TIME_ TODAY of hard work”.
- Satellite map option.
- Ad-free.
