On the Front Cover: Green Lighthouse

A beacon for sustainable building technology, Green Lighthouse, winner of multiple design prizes, opened in late 2009 as a showpiece for Copenhagen's UN Climate Change Conference (COP 15). The University of Copenhagen, VELUX Group and other partners joined forces to construct this innovative structure with an ideal balance of energy efficiency, architectural quality, a healthy indoor climate and optimal daylight conditions.

This is just one example of how the VELUX group is actively taking part in developing sustainable buildings – the buildings of the future. To learn more about Model Home 2020 visit www.velux.com.

Better Living Environments

The VELUX Group is working hard today on solutions for tomorrow! Working with architects. designers and builders, we assist in creating better living environments by using VELUX products to create an ideal balance of energy efficiency, healthy indoor climate and optimal daylight conditions.

Daylight from above is an essential, cost efficient element that transforms conventional rooms into splendid spaces and adds value to your home while contributing to your health and general well-being. Aside from these benefits, skylights also reduce the need for electric lighting. They provide 100% more natural light compared to vertical windows and 200% more compared to dormers.

Venting skylights open to draw warm air out. They provide a cooling effect and a flow of fresh air throughout the house while reducing electrical needs for air conditioning and removing harmful toxins from the home.

By choosing VELUX Skylights, Sun Tunnels and solar water heating systems, you are choosing the brand that delivers the highest quality and most reliable products on the market. Our new deck mounted product line, The No Leak Skylight™, launched last year, has exceeded our expectations in terms of acceptance and performance.

This year's price list acts as an informative tool for choosing the right product from a simple skylight installation to an elaborate eco-friendly renovation. To see how a skylight can transform your home, download the VELUX Skylight Planner on your smartphone from www.velux.ca.

Bringing light to life

Deck Mounted Skylights

The No Leak Skylight™

• No Leak Promise • No Worries

The Deck Mounted line of skylights is also coined "The No Leak Skylight". Ideal for new builds and renovations, this model mounts directly to the roof and offers 3 layers of water protection.

1. Deck Seal

A third layer of water protection! The pre-attached deck seal on all deck mounted skylights provides a seal between the frame and roof deck for leak-proof installation.

2. Roofing Underlayment

Adhesive underlayment for secondary water protection against the harshest weather conditions.

3. Step Flashing

Engineered flashing for easy installation and primary water protection. Proven to be the best on the market.

Features & Benefits - The No Leak Skylight™

Watertight

Deck Seal

For leak-proof installations, the pre-attached deck seal on deck mounted skylights provides a seal between the frame and roof deck.

Weather Barrier

Included in all deck mount flashing kits, the roofing underlayment creates secondary water protection against harsh weather.

Flashing

Engineered flashing for easy installation and primary water protection.

Energy Efficiency

LoE³ Glass

Outside temperature	-29°C	-7°C
Temperature of interior glass pane		
Single-pane	-18°	-1°
Double-pane clear	3°	10°
LoE ³ 366	11°	16°

Energy Star®

Deck Mount skylights will meet or exceed changing and more stringent current and 2013 Energy Star® guidelines.

CSA Certified

All Deck Mount skylights meet the requirements of the National Building Code.

Features

Easier Installation

Positioning notches and no cladding screws, among other features, make installation quick and easy.

Pre-Painted Frames

High quality interior pre-painted white frames eliminate need for costly trip from a painter.

Pick&Click!™ Blinds

Pre-mounted brackets make installation of blinds a snap. Simply choose a blind and snap into place.

Deck Mounted Skylights - The No Leak Skylight™

VSE | Electric Venting Skylights

VS | Manual Venting Skylights

Other features

Neutral grey colour and curved profiles blend with houses of today and past.

Codes and Approvals (for products listed on pg 7 & 9)

EKL/EKW

Deck mounted skylight combi-flashing

Combi-flashing can be used to install multiple skylights in groups for dramatic installations.

- Type EKL works with groupings on low-profile roofing materials such as shingles and shakes for dramatic multiple unit installations.
- Type EKW works with groupings on high-profile roofing materials such as tile or corrugated metal roofing.
- Must specify vertical gutter spacing when ordering. May be from 2½" to 12" in ½" increments. Combi-flashings with gutters 8" or wider have additional charges. Call for more Combi-flashing options and pricing.
- Many other combinations can be made beyond what is listed in the pricing chart below. Call customer service for
- Only the 2.5", 3", 3.5" and 4" gutters will be stocked; all other widths are special order only and carry a 30 day

ZOZ 211 Adhesive underlayment required. One (1) box per skylight. Combi-flashings are not available for models FCM, VCM, VCE or truss series. Combi-flashings are available for Roof Windows. Call VELUX for details.

VELUX Blinds

Available Models

Venetian Blind

The ideal solution for any room in your home that encounters high levels of humidity, such as kitchens and bathrooms.

- · Ability to control the direction and amount of the incoming light due to having full control over the slats' tilt and direction.
- · Glare control control direct sunlight to significantly reduce or eliminate glare on your TV or computer screen.
- · Colour: White

Roller Blind

Perfect for rooms when diffused light is desired such as home offices, playrooms, kitchens and bathrooms.

- Tight design and light diffusing fabric allows soft, diffused light to enter the room.
- · Provides basic privacy.
- Glare control diffuses direct sunlight to significantly reduce or eliminate glare on your TV or computer screen.
- Colour: White

Blackout Blind

Ideal for rooms that require total room darkening such as bedrooms or TV/ entertainment rooms.

- Tight design and light blocking fabric block sunlight completely.
- Thermo coating reflects heat from the sun in the summer, while retaining heat in the winter.
- Glare control eliminates direct sunlight to significantly reduce or eliminate glare on TVs or computer screens.
- Colour: White with thermo coating

Operation Options

Check skylight price charts for availability

Manual Operation

- · Blind is lowered and raised manually with a control rod.
- 3' rod extends to 6' (sold separately).

Electrical Operation

- RF (radio frequency) remote control (not included) allows you to operate a blind from anywhere in the house.
- Advanced, programmable remote provides features such as setting blinds to operate at certain times of day.

Simple to install! Does not require wiring. Simply snap blind into place.

- Operation of the blind is powered by a battery charged by solar cells (charged by the sun).
- Solar cell unit is discreetly integrated in the control bar.
- Can be operated even at night time and when the sun does not shine.
- Comes with a keypad for simple operation.

Curb Mounted Skylights FCM | Fixed Curb Mount **SPECIAL** \$100 OFF ON ALL FCM SOLAR BLINDS Superior LoE³ Glass Advanced LoE³ coating provides more daylight and better heat control compared to LoE2 glass for year-round comfort and energy savings. Visible light transmittance Corner key design eliminates improves 10%. water hazards. · Solar heat gain improves 20%. Dual gasket system seals to the curb, preventing water and air infiltration. Durable tempered LoE³ glass offers incredible protection from hail damage. Neutral grey colour, the choice of consumers and builders, blends with most roof shapes and colours. Durable aluminum frame for long life on the roof in extreme climates. Exterior fasteners save time and eliminate the need to enter into a home.

Benefits of upgrading to FCM

- Provide a quick and easy solution for replacing plastic or clear glass skylights.
- Energy efficient upgrade can save you hundreds in energy costs each year.
- Simple to install; easily fit over existing curbs.
- Exterior fasteners save time and eliminate the need to enter into a home.
- Can be installed horizontally.

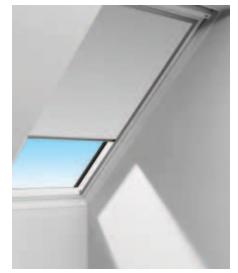

Accessory Tray

NEW! Tray included in price of blind. Accessory tray allows for full blind program on all FCM skylights. One tray required per blind.

Solar Powered Blinds

- Control your indoor environment by adding solar operated blinds to your fixed curb mount.
- Simple to install, no electrical wiring required.
- Blind operates with wireless keypad.
- Available in blackout or roller.

Pricing

- Can be installed sideways, flashing determined by horizontal dimension.
- Maintenance free exterior.
- \bullet Energy Plus option available for energy efficiency.
- Installation under 14° is not recommended where humidity is a concern.

Please note, curb mount blinds will also fit most standard site built curbs.

Curb Mounted Skylights - Ideal Energy Efficient Upgrade

VCE | Electric Venting Curb Mount VCM | Manual Venting Curb Mount

Custom FCM | Custom Fixed Curb Mount

High quality ABS frame designed to resist warpage in hot and cold climates.

Superior LoE³ Glass

Advanced LoE³ coating provides more daylight and better heat control compared to LoE² glass for year-round comfort and energy savings.

- · Visible light transmittance improves 10%.
- · Solar heat gain improves 20%.

Maintenance-free white frames and sashes provide for a high quality.

Advanced silicone glazing sealant around glass and frame connection is impervious to water and air and will last the life of the skylight.

Rain sensor closes skylight at first drop of

Comes with 20 feet of standard wire. (VCE)

* See page 22 for details

Pricing

- Package includes the remote KLR 100 and insect screen.
- · White maintenance free frame and sash.
- Single hard wire connects into a standard junction box.
- · Easily fits over existing curbs for quick and easy replacement.
- Rain sensor included
- Installation under 14° is not recommended where humidity is a concern.
- · Minimal power required (0.5 amp).

Sun Tunnel Skylights

NEW! Illuminate your home with natural daylight - in style.

The VELUX sun tunnel by designer Ross Lovegrove is a lamp that uses the sun as a bulb, making it a sustainable alternative to electric lighting. The sun tunnel by Lovegrove works to softly distribute natural light throughout your room, and allows you to adjust the light's intensity and angle. A simple, stylish way to transform your space with daylight; yet its classic creative design integrates beautifully with any interior. Winner of 2010 red dot award.

NEW! Flat glass Sun **Tunnel skylight**

- Low profile glass design creates sleek appearance on any roofline
- Perfect for developments where local ordinances do not allow acrylic dome skylights
- · Available in 14" rigid model only

How to Choose Your Sun Tunnel Skylight:

1. Consider Roof Orientation

- Pitched model (N.S.E.W exposure).
- Low profile model (S. exposure only).

2. Choose Tunnel Type

- Rigid For straight runs and moderate bends. Maximum light output.
- Flexible Easily bends around attic obstructions.

3. Choose Sun Tunnel Size and Ouantity

- 10", 14" or 21".
- Consider truss/rafter spacing.
- Consider room size and light requirements.

Pitched Flashing N, S, E, W exposures	010 Light Coverage	014 Light Coverage	021 Light Coverage
Rigid Tunnel	Up to 200 sq. ft. Model TMR 10	200 to 325 sq. ft. Model TMR 14	N/A
Flexible Tunnel	N/A	Up to 200 sq. ft. Model TMF 14	See TGF 21 option

Low Profile Flashing South exposures only

Rigid Tunnel	Up to 200 sq. ft. Model TGR 10	200 to 325 sq. ft. Model TGR 14	N/A
Flexible Tunnel	N/A	Up to 150 sq. ft. Model TGF 14	150 to 325 sq. ft. Model TGF 21

Chart is based on month of June and is intended as a guideline only.

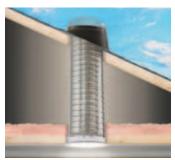

Sun Tunnel Skylight Installation Options:

Model TMR - Pitched flashing rigid tunnel. Most commonly used model.

Model TGR - Low profile flashing rigid tunnel.

Model TMF - Pitched flashing flexible tunnel.

Model TGF - Low profile flashing flexible tunnel.

Rigid low profile Rigid pitched flashing unit flashing unit

Flat glass flashing unit

- Package includes dome, shingle roof flashing, tunnel, two adjustable elbows, ceiling ring and diffuser.
- Flashings for tile roofs are optional.
- For flat roof application call VELUX.
- Light kit allows you to use the skylight as an extra light source even at night.
- Pitch adapter creates straight tunnel run maximizing light output (TMR/TGR).
- Flat glass exterior (TLR) creates sleek exterior appearance.

Solar Water Heating System

For 65 years, VELUX has been utilizing the power of the sun to bring natural light into homes through skylights and roof windows. Now VELUX is bringing its solar water heating system, proven for years in Europe, to Canada.

VELUX solar collectors have been designed with a low profile to be aesthetically pleasing and integrate well with rooflines. They utilize the same leak-proof flashing systems used with VELUX roof windows and have the look of a VELUX skylight.

How it works

- 1. The sun heats a solution in the rooftop solar collectors.
- 2. The heated solution is pumped through the heat exchanger in the hot water tank.
- 3. The heat exchanger heats the water in the hot water tank and the solution recirculates back to the rooftop solar collectors, where the cycle continuously repeats.
- 4. The heated water in the hot water tank is now ready for use in the home.

SWH Solar water heating system package

- Includes 2 solar collectors, 80 gallon solar storage tank, pumping station and flashing
- Basic package for average 3-5 person household
- Solar energy is an unlimited resource

- Can be an add-on to an existing system for a "green upgrade"
- · Additional components may be required. Call VELUX for more information

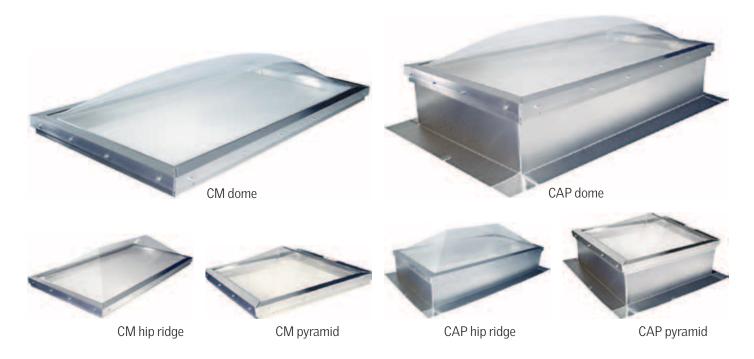

Basic package starts at \$5900

Custom Commercial Skylights

Custom commercial skylights CM / CAP

Utilizing quality commercial skylights from VELUX is the best way to bring natural light into a commercial or industrial space. VELUX commercial skylights provide high levels of visible light transmittance and create inviting spaces. Each CM and CAP skylight is completely customizable with all of the options and features you would expect from the leader in skylights. Call 1-800-888-3589 for pricing or more information.

- · Acrylic glazings available in clear over clear, clear over white, white over clear, or bronze over clear.*
- · Polycarbonate glazing available.
- Curb heights of 4", 6", 9", 12" and 16" available on CAP models.
- Termination trim available to ease installation on CAP models.
- Wide range of OSHA compliant skylights available.
- · Advanced weep system minimizes condensation.
- Optional louvers in CAP models provide ventilation without opening.

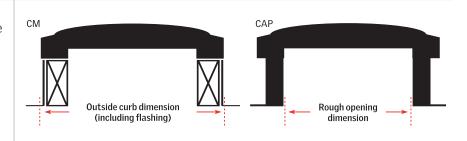

SFG fall protection screen Patented system that provides fall protection without penetrating the skylight

Skylights available to fit custom sizes available up to 102" wide x 150" long.

VELUX requires outside curb dimensions for CMs and rough opening dimensions for CAPs.

Approximately 6 week delivery.

^{*} Plastic skylights are not recommended for residential type applications. The visual clarity of plastic is not comparable to glass and will contain some degree of distortion and variation of the light passing through.

CSA Certification

VELUX Skylights and Sun Tunnel Skylights, including VSE, VS, FS, VCE, VCM, FCM, TMR, TGR, TMF and TGF have been certified to the following standards:

- AAMA/WDMA/CSA 101/I.S.2/A440-08 NAFS North American Fenestration Standard/Specification for Windows, Doors, and Skylights
- A440S1-09 Canadian Supplement to AAMA/WDMA/CSA 101/I.S.2/A440, NAFS
- Note: The electrical opening features, remote control and built in rain sensors were not evaluated and are not covered under CSA certification.

Glazings

Comfort (05)ComfortPlus (04)EnergyPlus (06)Snowload (10)	LoE ³	LoE ³ adds a third layer of silver coating providing the ideal balance of solar control, high visibility with the highest levels of year–round comfort and energy savings. Note: Roof Windows have a single low-e coating.	
	Insulation	95% argon gas injected between the panes to reduce heat gain.	
• ComfortPlus (Laminated)	Tempered over Laminate Glass	Shatter resistant safety glass with a polyvinyl interlayer prevents glass particles from falling if breakage occurs.	
	Technical Values	Provides 95% fade protection. Reduces heat gain by 64% compared to ordinary glass.	
• Comfort (Tempered)	Tempered over Tempered Glass	2-5x stronger than ordinary glass. Provides twice the condensation resistance compared to ordinary glass.	
	Technical Values	Fade Protection = Reduces heat gain by 64% compared to ordinary glass.	
• Energy Plus Additional Info Uses PVB interlayer that is 3 times thicker than the standard laminated cons		Uses PVB interlayer that is 3 times thicker than the standard laminated construction.	
• Snowload	Additional Info	Tempered LoE ³ pane over a laminated tempered interior pane with 0.030" interlayer to achieve higher snow load ratings. Refer to technical information - Glass.

Deck Mount Flashing				
EDL 14°-85° Roof Pitch	Used v requireSteps	Flashing kit for use with the deck mount skylight. Used with low profile roofing materials such as asphalt or fiberglass shingles (slate and cedar shingles may require additional steps ZZZ 200). Steps are interwoven with a layer of roofing material for proper water run-off and to provide a weather tight seal around the unit.		
EDW 14°-85° Roof Pitch	• Used v	ashing kit for use with a deck mount skylight. sed with high profile roofing materials such as concrete tiles, Spanish tiles, cedar shakes, and continuous rrugation sheet metal. ne patented sill flashing is a flexible aluminum apron which molds to the roofing material.		
EDM 14°-85° Roof Pitch	• Used v	 Flashing kit for use with the deck mount skylight. Used with corrugated sheet metal roofing materials, must have a minimum ¾" flat section between corrugations. 		
EKL,EKW 14°-85° Roof Pitch	than 1	 Combination flashing must be used for deck mount skylights and roof windows when installing them closer than 12 inches apart. EKL –combination flashing for low profile roofing material. EKW –combination flashing for high profile roofing material. 		
ECB 0°-14° Roof Pitch	 Counter flashing kit required when installing a deck mount skylight on a flat or low slope roof. Please contact VELUX for curb specifications. 			
Curb Mount Fl	lashing			
ECL 10°-60° Roof Pitch	 Step flashing kit for use with the curb mount skylight. Used with low profile roofing material. Designed for use with a site built 4 or 6 inch curb. 			
ECW 14°-60° Roof Pitch	 Flashing kit used with a curb mount skylight. Designed for use with a 6 or 8 inch curb. Used with high profile roofing materials such as concrete tiles, Spanish tiles, cedar shakes. The patented sill flashing is a flexible aluminum apron which molds to the roofing material. 			
Glossary of Te	rms			
Deck Seal		Patent-pending VELUX "Deck Seal". The 1% " flange/bracket sits directly on the roof deck with no gaps at the roof deck for air or water to enter.		
Pick&Click!™		Pre-mounted brackets make installation of blinds a snap. Simply choose a blind and snap into place.		
ZOZ 211		Self adhesive roofing underlayment included with the EDL, EDM, EDW and ECW flashing kit. Also sold separately.		

Warranty Summary

This Warranty applies to products manufactured as of January 1st, 2010. Please contact VELUX for warranty information for product manufactured prior to 2010.

NOTICE: All glass may be subject to unexpected and spontaneous breakage in rare circumstances due to imperfections in the glass that are undetectable during the manufacturing and inspection process by the manufacturer of the glass and VELUX. VELUX offers the choice of laminated or tempered glass skylights. Laminated glass is a combination of two or more glass sheets with one or more interlayers of plastic (PVB)or resin. In case of breakage, the interlayer is designed to hold the fragments together. Tempered glass does not contain an interlayer to hold the fragments together. Instead, tempered glass is designed to break into small, pebble-like pieces.

When tempered glass breaks, pieces of glass come loose and may strike an individual. Consult local regulations and/or building material consultants to determine which type of glass is right for you or if laminated glass is required in your application.

The pricing listed is suggested retail, dealer may sell for more or less. Prices listed in red are special order. Shipping is included on all skylight, sun tunnel skylight® and roof window orders. All other orders are subject to a \$15 freight charge. Shipping is not included on solar orders.
