

Computer Security

It's time for hardware to become hard-to-steal-ware

Did you know in the amount of time it takes to read through this brochure, someone could have walked away with your laptop, or accessed your personal computer? In only a couple of minutes your company's customer data base, financial information, employee personal records and other important data can be exposed, resulting in negative publicity, liability repercussions and more, not to mention the cost of hardware replacement.

Unfortunately when most people think of computer security, they think of firewalls, network security and anti-viral software but they don't think of physical computer security.

We take a different approach. Our products act as the first line of defense against unwanted access and theft. What good does all of that fancy software do if your laptop or CPU happens to sprout legs and walk away? Or what if all those cable locks and security devices won't keep a potential identity thief or hacker out of your computer's operating system?

All the firewalls in the world can't stop someone from physically accessing or stealing your computer...

But we can.

"Physically securing your hardware and preventing access to data is a critical component of a company's Security Risk Management policy."

-Joseph P. Harford
Co Founder & Vice President
Reclamere, Inc.
The Data Security Experts

"97% of stolen PCs are never recovered."

- FBI statistic

"The average laptop could contain data worth almost \$1 million."

- Semantec report

LapTop Depot™

CPU Locker™

NetBook Cart™

LapTop Locker™

TekStak™

One big happy (secure) family...

We carry an extensive line of physical security products for just about every electronic need. CPUs, laptops, printers, A/V equipment, MP3 players and more can rest easy, we've got them covered.

For detailed product specifications of anything you see in this brochure, visit www.datumfiling.com for downloadable pdfs or call 800-828-8018 to request printed literature.

CPU Locker™

Mobile Computer Station™

TekStak™

CPU Locker™

LapTop Cart™

Meet the triplets.

With technology running full speed ahead into our classrooms and businesses, people found themselves in need of a way to transport, store, and charge their laptops in a secure, locked-down environment.

Not to be outdone, we've come up with a solution that is versatile enough to work with virtually any computer interface, including Macs. Just call them the laptop transport triple threat.

LapTop Cart™

Brainchild of the bunch, the LapTop Cart™ is designed for use with virtually any full size laptop.

All carts come equipped with:

- Timer for switching between 2 banks of laptops
- Translucent tambour doors that take up less space to open and allow for visual inventory and charging verification
- Innovative patent pending Power Management Divider for unsurpassed cable management for each individual laptop

Top row L-R: Timer, casters, handle with cable management, pop up power center, hinged metal doors.
Bottom row L-R: Power management divider, ventilation pattern, dividers installed, on/off switch, storage shelf.

ClassMate Cart™

Slightly modified, the ClassMate Cart™ works with most mid-sized laptops and features a shelf inside for instructor use.

NetBook Cart™

Last but not least, the youngest of the group. The NetBook Cart™ features specially designed shelves and dividers to work with mini laptops.

LapTop Locker™

With reinforced anti-pry strips, reverse hinging, and three different lock options, the LapTop Locker™ is the laptop counterpart of the CPU Locker™.

LapTop Depot™

Storing more than one laptop? No problem. The LapTop Depot 5™ stores and charges 5 laptops. Can be mounted or made mobile.

LapTop Depot Cart™

Have more than 5 laptops, but less than a cart full? We've got the LapTop Depot 8 or 10 to solve that problem. Same features as the LapTop Depot 5™... only bigger.

Small scale with big payoffs.

When individual or small group storage is needed, look no further. We've got a collection of security options that deny access to stored goods that can accommodate just that. So whether you're in need of a personal security device, or you need to lock up just a few things, we've got what you need.

CPU & Server Locker™

The CPU Locker™, stationary, mobile, or mountable, is a great security solution for individual CPU towers.

TekStak™

For the ultimate in laptop and personal electronic storage, we offer the TekStak™. Available in multiple sizes, with or without charging, it's perfect for storing an individual's electronics in a public setting.

Classrooms on wheels.

Whether you're trying to put on a riveting presentation with the latest audio/visual technology, or you find yourself an instructor without a formal classroom, we have a secure "mobile instruction" solution for you.

Mobile Media Cart™

Most people remember the rickety old A/V carts from their school days. Wobbly, rusty, and disruptively loud when rolling down the hall, these gigantic fossils still seemed to never have enough room to hold all the equipment needed to put on a snore-inducing slideshow.

Thankfully, those days are gone, and we can now roll out the latest in audio/visual technology on the Mobile Media Cart™ equipped by RM.

Mobile Computer Station™

It's a student's worst nightmare. A teacher who can follow them around the halls, even after class is over.

Many times, instructors find themselves without a permanent room in their institution, so they're forced to take their classroom with them when the bell rings.

With the Mobile Computer Station™, everything becomes conveniently mobile and can be locked up when not in use.

A league of it's own.

Want a computer storage cart, but don't have the budget for it? Not to worry, we've got the Economy LapTop Cart™ just for you.

This cart features storage for up to 16 laptops of any size and a storage shelf on the bottom great for storing peripherals. You also have the option of making it a charging cart by adding a 16 outlet power strip to the bottom storage shelf.

As if that wasn't enough, you can also add a locking tambour door for added security.

A palette to suit any taste.

Are you going for a formal front office look? How about a fun, colorful classroom to keep your students entertained? No matter what feel you're going for, we've got color options to fit your decor. 19 of them, to be exact.

Trying to match furniture you already have? No problem. We can custom color match other manufacturers' color palettes.

We have a full line of laminates and melamines to compliment your color choices too.

So go ahead, request the spectrum, we like a challenge.

*Due to the nature of print, colors shown are not exact. Contact the factory for actual paint samples.

Power management dividers shown in all 19 standard paint colors.*

* Power Management Dividers only available in T25 - Black.

As the world continues to go digital, Datum recognizes the call for physical security products.

New hardware devices are constantly introduced and as technology evolves, so must our ability to expand and improve our product offering to stay ahead of the curve. That is why we focus on products essential to the specific needs of our clients. To do this we collaborate with people in real-world environments to adapt & invent innovative products that yield the results our clients are searching for.

If you face security challenges that seem to have no resolution, let us help. Give us a call or check out our website to see what leading edge ideas we're currently working on. We'll help you find something right for you because we want to help turn your hardware into hard-to-steal-ware.
