- Supports up to 1,000 lbs.
- Wider bumpers for greater stability
- ADA compliant
- Lifetime Warranty

Our Story...

The Adjust for Comfort™ Toilet Seat was created by a 75 year old, 285 pound man for his own personal needs. Tired of being uncomfortable when going to the bathroom, he thought to himself "there has got to be a better way!"

Having an inquisitive mind and an engineering background, he spent the next several years experimenting with different ideas. When he found he couldn't do without it, he realized he might be onto something. His desire to share his new-found comfort, support and relaxation with others led him to patent and commercialize his easy access adjust for comfort toilet seat.

What you are seeing now is the result of several years of drive, determination and good old-fashioned American spirit to take a simple everyday household item and make it even better.
