MobileDemand Awarded GSA Schedule 70 through Partnership with SDV Tech *Rugged xTablets Ideal for Inspections, Training, Asset Tracking and the Battlefield*

Hiawatha, Iowa – Tuesday, July 26, 2011. MobileDemand, a leading provider of [rugged Tablet PCs for the military, government and public sector](#) agencies, announces a reseller partnership agreement with SDV Tech, a service-disabled veteran-owned small business and distributor of information technology to the federal government, branches of the military and federal integrator community. MobileDemand also announces that its rugged Tablet PCs can now be purchased on a GSA Schedule-- General Services Administration Federal Supply Schedule for General Purpose Commercial Information Technology Equipment, Software, and Services.

The GSA Schedule 70 award allows the federal, state and local governments to purchase MobileDemand products from SDV Tech through a streamlined process and pre-negotiated pricing that will save them time, resources and money.

The MobileDemand products now available on the GSA IT Schedule 70 include specific configurations of the xTablet T7000, xTablet T8700 and xTablet C1200 ruggedized [Tablet PC](#), options and accessories. MobileDemand has been providing products to the military and government agencies for several years. The US Army is using xTablets for asset tracking, and mapping in the battlefield. The USDA uses the MobileDemand [rugged Tablet PC for field inspections](#). Other applications of the xTablet PC include field training and use in robotic minesweepers.

xTablets are built military rugged to withstand the rigors of government field work and military battlefields. They are MIL-STD 810G compliant and have an Ingress (Sealant) Rating of up to IP65, which means they have been tested to survive pressured water, temperature extremes, rain, humidity, salt, sand, dust, shock, vibration and 26 consecutive drops from 5 feet.

The MobileDemand product offering now available on the GSA Schedule coupled with SDV Tech's background in government procurement provides an ideal blend of superior mobile computing technology and military and public sector expertise.

"The partnership with SDV Tech is strategically important for MobileDemand," says MobileDemand President Matt Miller. "Military and government agencies have sought out our products and purchased them for years because of their multi-functionality, Microsoft Windows architecture and Intel processing power in addition to their ruggedness. SDV Tech has a deep understanding of the challenges faced by the government and extensive experience in helping fulfill its growing information technology needs. Together we further strengthen our commitment to the government by providing a compelling value proposition – knowledge of government technology needs and superior, proven [rugged computers](#) at favorable prices that are lower than those offered by competitors," Miller continues.

SDV Tech, headquartered in St. Paul, MN has been serving the needs of the military and Federal government since 2007. "We are honored to represent MobileDemand on the GSA IT Schedule 70," says President of SDV Tech Jason Spangler. "The combination of MobileDemand's state-of-the-art rugged Tablet PC and SDV Tech's background in federal government procurement practices and delivering
