

# We solve business problems.

*Your business is unique. Your software should be too.*

## Custom software specialists for smart business

Writing software is a science. Making it work for human beings is an art. That's what we do.

Our software can do anything for your business. Because it's designed to meet your specific business needs, it can improve your business process flow, streamline your manufacturing, or simply increase your workforce efficiency. No matter what the challenge, custom software improves your productivity. Your business is unique, your software should be too.

Most custom software is complicated and costly. That's why smart businesses choose Xeo Software. We make software easy, cost-effective, and exactly what you need. We not only save you money, we save you head count.

## Custom software, Infinite Possibilities

We're software architects and interface engineers—but we also understand people. Working with us is easy because we've created a step-by-step, collaborative, and finely tuned process. Through this process we are able to comprehensively understand your business problems and operations. Not only do we build your software from scratch, we build relationships with our clients.

## Rapid, accurate, efficient

You can increase your company's efficiency, speed and accuracy through software automation. We utilize rapid application development, so our automated code generation produces perfect code in seconds when it would take other companies weeks of laborious hand coding and debugging. This means consistent code, time and again. What does that mean for your business? *Our software is dependable, so your business operations are never interrupted with software glitches.*

*"Xeo has been a valuable extension of our development team. They brought creativity and a sense of urgency to a pivotal project."*

*Joe Manzari, Chief Operating Officer  
Industry Retail Group*

*"My experience with your company has been excellent! Thank you for all that you do for us!"*

*Karen Honda, Assistant Branch Manager  
Ampco System Parking, Hawaii Region.*

## About Xeo

We love what we do and it shows! Our enthusiasm is reflected in the quality of our engineering, the responsiveness of our customer service, and from 2000 to today, it drives us to constantly learn and innovate.

Xeo was formed in 2000 when our founder, Maurice McIver, traded in his Army uniform for the chance to work with clients one-on-one as a freelance database consultant. Through the years, he has been personally involved in each of the scores of applications the company has produced. Even today, though the company has grown to almost 20 people and two offices, Maurice works directly with our client's CEO's and end users alike so he can hear first-hand how our solutions perform in the field and to pick up on the great ideas that our clients have for making software even better.

We believe that this collaborative approach to software development and the personal involvement of our founder is a key reason for our success. Of course it doesn't hurt that we love what we do!
