TIFFANY'S LUXURY MEDISPA ANNOUNCES EXCLUSIVE ONE HOUR FACELIFT PROCEDURE

Central Valley residents introduced to medical breakthrough that can take years off their appearance at a fraction of the cost of traditional surgical facelifts.

(Visalia, CA) By the time Central Valley men and women reach their 40's, the toll of aging begins to show itself. It has become very socially acceptable and common to use medical procedures to slow this aging process down. Now, thanks to the miracle of modern medicine, men and women can experience a reversal of the aging process, and the effects can last for decades.

Until recently, the process of recapturing youth carried a substantial physical and financial price. For those who historically opted for the traditional surgical facelift, it carried an average price of \$20,000. Additionally, they would face an expensive hospital stay and at least six weeks of recovery. For many, this option was simply not viable.

But thanks to Tiffany Smith-Edmonds, and the talent of her husband, Dr. Andre Peter Edmonds, Central California residents now have access to this medical breakthrough procedure which restores youth without the significant cost or downtime of a traditional facelift.

Tiffany's One Hour Facelift is a new facelift technique that is performed with local anesthetic in 60 minutes or less and without any hospitalization. Utilizing state-of-the-art techniques, this procedure utilizes scientifically developed threads, created by Silhouette which is located in Barcelona, Spain. Tiffany's Luxury Medispa is the only Central California location that offers this procedure. This procedure requires special medical training by the developers of this new technology.

"This procedure is extremely sophisticated, really cutting-edge technology," said Edmonds, "Our experience so far has been beyond our wildest expectations. Our clients who have had the procedure are thrilled with the results."

Dr. Edmonds, a noted trauma surgeon and orthopedic specialist is also Medical Director of Tiffany's Luxury Medispa where he performs this procedure. He commented, "It is exciting to be able to offer this medical breakthrough to people in Central California. We are now able to experience the results of the most sophisticated technology right here at home. Clients leave our Medispa looking 20 years younger without the use of general anesthesia and without the expense normally associated with a traditional facelift. Incredibly, it all takes only an hour or less."

Dr. Edmonds (BSc, MD, CM, FRCS(C), FICS, FACS, FAAOS) has extensive training and experience as a skilled trauma surgeon which has uniquely prepared him to operate on the most difficult cases. Dr. Edmonds has also invested his talent and resources into the field of cosmetic surgery, bringing the best of both worlds to clients in the Central California.

He added, "We have been so successful that the C.E.O. of Silhouette flies their surgeon all the way to our location for training. It is very exciting to see that the genius behind this medical breakthrough recognizes our commitment to excellence."

Client Sandy Carl, who has undergone the procedure, feels it was a fabulous investment. "I feel so much better about myself." said Carl. She added, "The procedure was quick, painless and so much less expensive than the traditional face-lift I was considering."

Tiffany's Luxury Medispa has developed the reputation as one of the finest and most luxurious full service spa and medispa's in Central California. They offer a full line of services that include skin rejuvenation, Cynosure SmartLipo, laser hair removal, vein therapy, Botox, Juvederm, Latisse as well as a full offering of traditional spa services.
