

A PERSONAL MANAGED TELEPRESENCE & VIDEO COLLABORATION SERVICE FOR YOUR PC / MAC

iView - Powered by Vidyo is a personal telepresence service that enables business-quality face-to-face video collaboration right from your desktop or laptop – anywhere, anytime.

Service Overview

iView - Powered by Vidyo is a mobile, software-based, easy-to-use and cost-effective video collaboration service that is perfect for conducting video meetings with your colleagues, customers, partners and vendors, right from your desktop or laptop – while you are traveling, working from a home office, or even from a coffee shop. With iView - Powered by Vidyo, you can experience business-quality video collaboration on a standard broadband connection with access to content sharing and all other features of a standard video collaboration service in real-time – in a way that nobody will realize that you are away from your office.

iView - Powered by Vidyo takes full advantage of Vidyo's patented technology, yielding imperceptible latency and high network error resiliency to deliver natural, high quality point-to-point and multi-point telepresence experiences anywhere over the Internet.
