

***Participate in the Cosmic Convergence  
September 23-26, 2011!***

The world as we know it is now entering a period of intensified chaos all of which has been predicted by several ancient prophecies including Christian, Hopi, Mayan and Muslim. There will be no return to "normality". Our world based on hierarchical orders and the principle of duality is in the process of changing. The prophecies also point to a possible birth of a new world to follow the present one based on a transformation of a significant part of humanity. Such a transformation is however not going to happen automatically. Each one of us has a free will. This transformation will have to be based on personal responsibility and a commitment to be part of a shift to a new way of being: unity consciousness. These are the underlying premises for the event called the Cosmic Convergence to be celebrated worldwide on September 23-26, 2011 by whoever chooses to do so individually or in a small or large group. It is open to everyone regardless of race, religion, nationality or gender.

The choice of time for this event is based on two converging phenomena of a cosmic nature. One is that in the Mayan calendar this is a great opportunity to make a commitment to a new way of being based on unity consciousness. This may be seen as a passport to the new world of 2012. Another is that it coincides with the passage of the comet Elenin between the earth and the sun. The interpretation of the significance of this comet differ very widely and all that will be taken for granted here is that it will give humanity an enhanced experience of its cosmic origin.

Participants and organizers of the Cosmic Convergence may create events according to their own ideas as long as they are based on a commitment to be part of a shift to unity consciousness. Participants are asked to make two declarations expressing this commitment:

1. That we will consistently let our lives be guided by divine guidance rather than our egos.
2. That we pledge to focus on Love & Compassion for ALL Life seeing the world united in peace..

Based on these declarations many different spiritual practices, such as prayers or meditations may be developed for this event, but it is important that the very far reaching consequences of these declarations are recognized and probed in depth by those that chose to make them. No matter what happens in the external world up until these dates the cosmos is inviting us to take the stand for a radical shift in the world beginning with ourselves. Or as Mahatma Gandhi said: Be the change you want to see in the world!

Please help the shift become a reality and encourage everyone on this planet to take part in a solemn, and yet joyful, expression of a stand for the transformation of our world. Help spread the word in all possible forms. Facilitate gatherings large, or more appropriately small, where we can all go inside and ask

ourselves if we are willing to make such solemn commitments to transform ourselves and thus help a new world be born.

A third thing we ask you to consider is making your declaration public by registering your intent on a Global map sponsored by the **Know Thyself Initiative**. One of the coordinators of the Lothlorien Peace Festival is my friend Les Carney, known by many as Leyland. He writes the information that follows for your consideration.

"When we talk about the Shift in our world, it's easy for it to feel abstract and not particularly connected to our daily lives. However, it's an intimate and personal process that begins with you, me and people like us around the world linking into a potent transformational community.

We build momentum first as hundreds and then thousands of people begin to act as their own activation point for the larger Shift. We create a ripple effect that resonates around the world as we each embody a new level of consciousness.

We become our own broadcast station, sending out signals to our family, friends and communities that a new, peaceful, loving and creative humanity **IS** possible. We serve as divine emissaries -- building bridges, healing wounds, evolving organizations and harmonizing troubled situations. We all activate the Shift in millions of ways -- small, large, quiet, outward and everything in between.

United there is nothing we cannot do! However, we have been split by various dogmas and beliefs that have separated us into many different groups. War has deliberately been used for thousands of years by the "dark Ones" to create a "them and us" mentality and make enemies amongst people where none previously existed.

This has happened on a global scale through wars and political strife, but it has also become a way of life even amongst those of us who intend to be of service to the higher good. On a personal level we have fragmented into various modalities and religious and cultural perspectives. Like developing children we have gone about our way on parallel "paths". Now is a time for us to mature more fully into a world of sharing and understanding that all our "paths" are leading to that "field" where Rumi declares: "I will meet you there."

Will you please go to the initiative at: <http://www.triple7center.com> and declare your intention by placing your name on the map? When at the map, if you let the cursor scroll over California, you'll find my name listed as Leyland. On the first page scroll to the bottom and click: "**Add Your Light**" which will take you to the second page where you can Donate if you choose to do so. This is optional. Donating is a way to add extra energy to your declared intention. If you elect to not donate, click the Light of Hope Form: **LOH Form**. This will bring up the PDF form you need to complete for proper placement of your Light on the map. Once completed, click **Submit by Email** at the top left corner of the PDF form. I look forward to seeing your light appear on the map as we link together into a potent transformational community.

Les Carney (Leyland)

Elder Activities Coordinator
