## ‘Goods Order Inventory System (GOIS)’ Android based application launched by MetaOption LLC

*Goods Order is a free, inventory management system for the small business users and individuals willing to manage Orders, Inventory and Sales on mobile platform. It provides the flexibility to manage the products, orders, sales & inventory seamlessly on iPhone, Android & Nokia (Symbian) devices.*

**Jersey City, NJ (Aug 26, 2011)** – MetaOption, LLC is proud to announce the launch of inventory management solution product “Goods Order Inventory System (GOIS)” on Android phones and tablets. Goods Order is a free, inventory management system for the small business users and individuals willing to manage Orders, Inventory and Sales on mobile platform. It provides the flexibility to manage the products, orders, sales & inventory seamlessly on iPhone, Android & Nokia (Symbian) devices. Features like report, sales tracking with/without inventory, and simple user interface provides the user to manage / track all the business data at any time & anywhere easily.

To download GOIS Android app from Android Marketplace please follow the link  
<https://market.android.com/details?id=com.metaoption.goodsorderinventory>

The iPhone version of the app was released earlier which can be downloaded from  
<http://itunes.apple.com/us/app/goods-order-inventory/id433616596?mt=8&ls=1>

Nokia version is under development and we expect to release this in few weeks along with next version of iPhone app.

MetaOption is also working on web integrated version of Goods Order Inventory System (GOIS) which is Goods Order Pro “**GOIS Pro**”. “GOIS Pro” will offer many benefits over standalone version of Goods Order release currently. Follow the link  
<http://www.goodsorderinventory.com/GoodsOrderInventoryPro.aspx> to learn some of the benefits of “GOIS Pro”.

We “thank you” for using our application and we appreciate any feedback you may have for us. You may write us at [support@goodsorderinventory.com](mailto:support@goodsorderinventory.com)
