Relationship Management

Levementum creates and executes Demand Chain strategies that propel financial performance.

DEMAND CHAIN:

THE SET OF RELATIONSHIPS AND INTERACTIONS THAT A COMPANY LEVERAGES TO ACQUIRE AND SATISFY CUSTOMERS.

Levementum is a global Demand Chain consulting and technology services company. Combining a powerful company culture, world class capabilities, a broad array of industry solutions, and a deep commitment to powerful open source technologies, Levementum empowers companies to acquire and satisfy customers resulting in world class financial results.

The bricks and clicks of today have added complexity to sales and marketing, but have provided amazing opportunity at the same time. Customers are smarter, plus competition is fierce and global. The Quality/Cost/Speed Tradeoff model of the 20th century no longer applies. Mix in partner management, support processes, and delivery...you have a recipe for information complexity and potential overload. Levementum helps demystify the complexity, and collaborates with you to identify and implement the right process and information model to foster world class performance and consistency.

Levementum's clients benefit from decades of technology and business knowledge all while leveraging their cutting edge ability to provide world class results. Whether a client is a large enterprise that needs to stay competitive or a small firm that wants to compete with the big businesses, the tools and methods that have been honed at Levementum, allow us to energize a firm's Demand Chain with balanced and measured investment.

OPEN SOURCE TECHNOLOGY:

A COMMERCIAL AND COMMUNITY SOFTWARE CONSTRUCTION METHODOLOGY THAT RESULTS IN WORLD CLASS CAPABILITIES AND UNSURPASSED FLEXIBILITY, AT THE LOWEST POSSIBLE COST.

Levementum aggressively leverages Open Source technology to implement world class Demand Chain strategies. Through a proven and committed ecosystem of alliance partners, Levementum is empowered to deliver world-class results for their clients. This strategic ecosystem provides an unbeatable array of technologies that are well matched to compliment the tools Levementum has developed and mastered over the years. SugarCRM, Magento, OpenERP, Mindtouch, along with other select world class solutions comprise the technology tools at Levementum's disposal.

ALLIANCE PARTNERS:
