

TALENTFLOW

Acquire. Build. Optimize.

IMPROVE CORPORATE HIRING PERFORMANCE
ACHIEVE BETTER RESULTS WITH LESS SPEND

- Are you attempting to optimize your 2011 budgets?
- Are your HR & hiring strategies aligned with corporate goals?
- Do you recognize a need to streamline and automate your processes?
- Are your processes standardized and compliant?
- Are you taking advantage of industry best practices?
- Have you realized your branding potential to attract the best talent?
- Are your hiring managers and recruitment team results-driven?
- Do you have a comprehensive view into hiring activity and tools to produce relevant data?

If your executive team is wrestling with any of these questions, join TalentFlow, industry Human Capital Management (HCM) experts, for a free webinar and consultation. We'll help you figure it out...

Our team of professionals and industry experts will demonstrate TalentFlow, a cutting edge software platform that will help you

- Save 10-30% on contingent spending
- Access a larger number of more qualified candidates
- Increase administrative efficiencies by at least 60%
- Reduce time spent and overhead with automation and web-enablement
- Ensure lowest negotiated vendor rates
- Plan and budget better with comprehensive analytics and reporting
- Centralize all staffing vendors and employment records and requests
- Monitor and enforce compliance and maintain consistency

*****All Webinar attendees will receive a free 2-hour Recruitment Process Analysis*****

Make 2011 the year your organization **AQUIRES** the right processes and technology, **BUILDS** the best talent pool for contingent and permanent hires and **OPTIMIZES** your HR budget and investments.

TALENTFLOW

Acquire. Build. Optimize.

**IMPROVE CORPORATE HIRING PERFORMANCE
ACHIEVE BETTER RESULTS WITH LESS SPEND**

ABOUT TALENTFLOW

TalentFlow is a powerful HCM suite built, maintained and customized by ISO-certified engineers and is currently used at over 200 client sites in 27 countries.

Each tier of its 3-tier J2EE architecture can be independently scaled according to client need and means.

TalentFlow's delivery as Software as a Service (SaaS) reduces licensing costs considerably and increases self-service and user-friendliness.

TalentFlow is comprised of three distinct, fully Web-based modules, each of which can operate on a stand-alone basis or be integrated with other modules, existing client websites, HRIS and ERP systems.

Applicant Tracking System (ATS)

The ATS module automates the development of job requisitions and postings, candidate searches, applicant screening, ranking and assessment.

Vendor Management System (VMS)

The VMS module streamlines the process of engaging and managing multiple preferred staffing vendors and levels the playing field with open and transparent competitive bidding.

Back Office System (BOS)

The BOS module substantially improves the administrative efficiency of back office functions, such as payroll, through automation, web services and advanced reporting capabilities
