Delivering
Solutions

OUR FOCUS

Improved Business Performance

KMA designs and builds custom IT solutions on the Microsoft platform that help knowledge workers and organizations throughout New England achieve improved business performance through collaboration, insight, and productivity.

Collaboration	Insight	Productivity	Improved Business Performance
Connect, share, and access the right people and information.	Assemble and explore data in depth and in detail to make informed decisions.	Streamline business processes and automate workflows.	Increased revenues, reduced costs, deeper customer & employee engagement, and greater business agility.

Our Approach

We assess, develop and deliver solutions that focus on your business goals, and help you maximize your investment in Microsoft technologies. Superior talent, business & technology expertise, creative problem-solving skills, and tried-and-true project management techniques enable our teams to consistently manage and control the time, cost, quality, and risks associated with each project.

Our Industries

High Tech
Financial Services
Professional Services
Life Sciences
Health Care
Manufacturing
Not-for-Profit

"Using Microsoft technologies to solve real business issues is KMA's specialty.   They helped us understand our business problems and identify and deploy the right technologies to solve them. "

-John Schmottlach, Director of Business Systems, Empirix

Knowledge Management Associates, a Microsoft Gold-Certified Partner helps organizations become more collaborative, insightful, and productive.

Business and Technology Expertise

Our consultants bring expertise across business disciplines of sales, marketing, operations, and finance, while offering best practices in business process design, knowledge management, performance measurement, data analysis, and information presentation.

Every day, we challenge ourselves to explore how new technologies translate into improved business processes and outcomes for clients throughout New England.

Deep Expertise in Microsoft Tools

KMA technical professionals are continually trained on the latest Microsoft software and tools to deliver highly tailored solutions while leveraging clients' existing investments in the Microsoft platform.

Microsoft® SharePoint®	Microsoft® SQL Server®
Microsoft® FAST Search Server for Internet Sites	Microsoft® Project Server
Windows® Azure™	Microsoft® Visual Studio®
Microsoft® Office 365	Microsoft® Office

SharePoint Capabilities

KMA's SharePoint practice has been involved with hundreds of SharePoint implementation projects and our consultants bring an average of 15 years technology and business experience to each engagement.

Whether you are:
- evaluating SharePoint as a solution
- embarking on your initial deployment
- upgrading or migrating your SharePoint environment
- enhancing, extending, or integrating SharePoint with other applications
- needing help managing and supporting your environment
