When your dog or cat takes those first curious sniffs of a new P.L.A.Y. bed, you'll sense that something great is happening. Why?

Because P.L.A.Y. has a unique approach to designing special things for your pet. One that takes you, your pet and our planet very seriously. And takes fun pretty seriously, too.

BETTER FOR YOUR PET

all cotton coverings

You know that cotton makes you feel great. It is soft, breathable and allergy-free. No big surprise, it feels amazing to your pet, too. So we use 100% cotton coverings to totally pamper your pet. These zippered coverings can also be easily removed for washing.

made to baby your pet

Our dogs and cats mean the world to us. So we believe pet beds should be manufactured to the highest quality standards. How high? All of our pet beds are made in a facility that meets the strict quality standards for manufacturing infant and children products. We're talking baby-safe.

BETTER FOR YOU

100% machine washable & all components sold separately

Let's face it: pet beds get dirty. So our covers are all 100% machine washable. And should you see more than one cover that you simply can't live without, they're all sold separately. So you can easily zip one off and zip another one on.

exclusive designs

The all-cotton coverings on our Artist Collection beds have designs that were created exclusively for P.L.A.Y. by local artists here in San Francisco. Stylish, creative and – of course – playful, these designs turn our beds into fluffy and irresistible works of art that complement any home.

BETTER FOR YOUR PLANET

recycled materials

Your dog or cat will feel pure comfort. You'll feel the satisfaction of knowing that the Planet Fill™ in our pet beds is made of certified-safe, 100% post-consumer recycled products. Planet Fill™ is our own trademarked filler created from cleaned and recycled plastic bottles!

eco-friendly packaging

While we don't use much packaging at P.L.A.Y., what we do use meets the highest standards. For example, our product tags use materials that are certified-safe by the Forest Stewardship Council (FSC), the only forest certification system that is supported by all major environmental groups.
