Qiwi Mobility released today the new and improved Qiwi Mobility for Microsoft Dynamics NAV!

We very much look forward to working with you!

NEW FEATURES!!

- **Offline capabilities** – that's right, even if you are out in the middle of nowhere, you can still have your Dynamics NAV data with you, and use Qiwi right as if you were connected real time!!
- **New Webservice integration** – no more setting up the Navision Application Server and MSMQ's!
- **Execution of Codeunits from Device** – now you can post sales orders/purchase orders or any other execution
- **Utilization of Windows Authentication** – use the NAV security!
- **No More Security Check with MyQiwi** – which means no more setup of MyQiwi.com
- **New Pricing** – With no more security check, you can have as many users as you want (lower per user pricing in the iTunes Store and you can have as many applications/forms/tables as you want! Make it complex, make it easy, one simple price!)
- **New "better looking" interface** – speaks for itself!

Some solutions that are out in the marketplace that just were not feasible or didn't provide the functionality that the end users needed, Qiwi Mobility has become the name to trust! With the new features and improvements to Qiwi, it is going to become the brand that YOU trust! Just some of the benefits of Mobility to your clients are:

Advanced Productivity
Better, More Active Customer Service
Competitive Advantage
Accurate Information Capturing

With Qiwi Mobility you get all of these with the ease and flexibility of Microsoft Dynamics NAV!

Contact me for a demonstration of the new Qiwi Mobility, and I will be happy to accommodate.

Best Regards,

John R. Stevens
Vice President
