

Remote Desktop for Mac

Instant access to a remote PC or Mac!

Travel light and have full access to the computing power of your main PC or Mac. Access your files and multimedia content on a remote computer with exceptional audio, video, and real-time interactivity all from a Mac.

- Connect from anywhere via local network or across the Internet
- Access important files or photos on another computer without worrying about syncing, converting, or compatibility issues
- Use MS Office, Silverlight, and other Windows software without having to install it on a Mac
- Play HD movies and music from your central media libraries without the hassle of transferring files
- Run graphic-intensive PC games on a powerful machine and play them from a portable Mac
- Save energy with Wake-on-LAN

Download from the Mac App Store
