

Sunrise Capital Partners Expands Trading Universe, Implementing Coverage of 15 New Markets

SAN DIEGO, September 22, 2011 – Leading global macro trading firm Sunrise Capital Partners, today announced the second expansion of its trading universe this year. The addition of 15 new markets to the firm's trading strategies is designed to improve risk-reward outcomes for clients of both the Sunrise Expanded Diversified and Aggressive Diversified strategies and follows an expansion of five markets in February.

“By further expanding our investment realm, we believe we have again enhanced our ability to add alpha for Sunrise's investors while simultaneously providing them with the critically important portfolio protection benefits of geographical, market, and sector diversification,” said Sunrise Acting Managing Director Jason Gerlach. “We are continuing to monitor and test additional tradable world markets for opportunities that hold potential to further enhance returns.”

As of September 1, Sunrise has added Kansas City Wheat futures, Live Cattle futures, Canadian Government Bond futures, Short Sterling Futures, DJIA Mini futures, H-Shares (China) futures, JSE Share Index (South Africa) futures, Ibex (Spain) futures, Italian Stock Index Futures, Nifty (India) Futures, Taiwan MSCI futures, and the following currency forward markets: Brazilian Real, Czech Koruna, Danish Krone, and Norwegian Kroner.

With the latest universe expansion, Sunrise's Expanded Diversified and Aggressive Diversified trading strategies each trade more than 70 liquid, global financial and commodity markets for clients. Sunrise will continue to study the potential benefit of additional markets in proprietary research accounts. To be included in the Sunrise strategies' investment universe, a trading market is subject to months of research and development, including in-depth evaluation and back testing.

Sunrise's adaptive and evolutionary research platform is characterized by continuous identification, testing, and evaluation of markets and methods to ensure that the global macro strategy continues to capture opportunity and avoid risk amid a dynamic changing global investment environment. The Sunrise research effort continuously seeks to discover new opportunities and enhanced methods and strategies to improve risk-reward outcomes for clients.
